RE: Notice of Violation

Dear Mr. Kennedy:

Enclosed you will find a Notice of Violation (NOV) issued to EnCana Oil and Gas (USA), Inc. by the Department of Environmental Quality, Air Quality Division, for failing to comply with the permit requirement for routing vapors to the combustor for the Cabrito 8-25 Central Facility located in Sublette County, Wyoming. This violation of permit CT-3339 was observed by Ms. Jennifer Frazier on March 24, 2008.

As the Department and this Division consider the failure to comply with air quality permit conditions to be a serious matter, I am considering recommending the Department refer this violation to the State Attorney General's office requesting a suit be filed in District Court to recover appropriate penalties. If you would like to discuss settlement of this Notice of Violation prior to referral to the Attorney General's office, please contact Ms. Karen Godman, Air Quality Compliance Program Principal, at 307-777-3774 no later than ten (10) days after receipt of this letter.

Should you have any questions or comments regarding this matter, please feel free to contact me or Ms. Karen Godman.

Sincerely,

David A. Finley
Administrator
Air Quality Division

NOTICE OF VIOLATION

NOTICE IS HEREBY GIVEN THAT:

1. The Department of Environmental Quality, Division of Air Quality, has found EnCana Oil and Gas (USA), Inc. to be in violation of permit CT-3339 issued in accordance with W.S. 35-11-801 of the Wyoming Environmental Quality Act and Chapter 6, Section 2 of the Wyoming Air Quality Standards and Regulations at the Cabrito 8-25 Central Facility located in Sublette County, Wyoming.

2. W.S. 35-11-801(a) states, "In granting permits, the Director may impose such conditions as may be necessary to accomplish the purpose of this act which are not inconsistent with the existing rules, regulations and standards."

3. Chapter 6, Section 2 of the Wyoming Air Quality Standards and Regulations prescribes the applicability and procedures for issuing permits to sources under Wyoming's construction and modification permitting program.

4. Permit CT-3339 was issued to McMurry Oil Company on June 24, 2003. Subsequently, this facility name was transferred to EnCana Oil and Gas (USA), Inc. on May 2, 2008. Permit CT-3339 dictates control of vent vapors from tanks through condition 5 as follows:

Condition 5 states:

"Vapors from the two 300-barrel condensate storage tanks, which include LP separator flash gas, shall be routed to a combustion device for 98% control of VOC emissions for at least one year following the date of installation of the control device, after which time the control may be removed provided it can be demonstrated that the previous 30-day, uncontrolled, annualized VOC emission rate is less than 30 tons per year..."

5. On March 24, 2008, Ms. Jennifer Frazier, Air Quality Division Engineer/Inspector, observed continuous vapors venting from four thief hatches and an Enardo valve dripping condensate. Venting vapors from thief hatches and Enardo valves and not routing vapors from the condensate tanks to the combustion device is a violation of condition 5 of permit CT-3339.

6. Said violation consists of venting vapors from thief hatches and Enardo valves and not routing vapors from the condensate tanks to the combustion device.
