Re: Notice of Violation Docket # 5452-14 for the Pinedale Complex

Dear Ms. Fontaine:

Following the meeting between QEPM Gathering (QEPM) and the Division on November 13, 2014, a follow up letter from QEPM dated November 20, 2014 and an email dated April 13, 2015, it was determined that the failed initial emission testing of the Solar Titan 130 Turbine (TUR 1) performed on June 25, 2014, was an unavoidable equipment malfunction. The manufacturer replaced the failed bleed valve under warranty and the turbine was successfully retested on July 2, 2014.

On the basis of the above determination, no further action will be taken regarding the Notice of Violation and the Division considers the notice closed. If you should have any questions, please feel free to contact Ann Shed at (307) 777-8601.

Sincerely,

Steven A. Dietrich  
Administrator  
Air Quality Division
