From: Jamie O'Dell, Operating Permit Writer

Subject: Draft Operating Permit 3-1-133-2 for American Colloid Company, Lovell Plant

Date: February 22, 2008

Attached for your review is a draft Wyoming Air Quality Standards and Regulations (WAQSR) Chapter 6, Section 3 operating permit modification for American Colloid Company, Lovell Plant. The operating permit is being modified to incorporate an additional Chapter 6, Section 2 permit as requested by the applicant.

Permitting History

Permit MD-6850 (12/19/2007) was issued to remove the operating hours limit for unit DC-04. There are no other new requirements contained in this permit.

Changes in Permit 3-1-133-2

The following information and conditions have been changed in operating permit 3-1-133-2 to remove all reference to any operating hours limit for unit DC-04. Permit revisions include:

- The Source Emission Points Table is updated to include the new Ch 6, Sec 2 Permit reference to MD-6850.
- Conditions F1, F10, F13 & F16 (Operating Hours Limits, Monitoring, Records and Reports) are revised to remove the operating hours limit for unit DC-04.
- The Summary of Source Emission Limits and Requirements Tables are revised to reflect the changes to the permit, and an additional table is included to clarify the specific requirements for the DC-04 unit.
