Subject: Draft Operating Permit 3-3-038-1, Source Gas, LLC
Bunker Hill Compressor Station

Date: November 5, 2012

Attached is a draft of Wyoming Air Quality Standards and Regulations (WAQSR) Ch 6, Sec 3 modified operating permit 3-3-038-1 for the Bunker Hill Compressor Station. Waiver wv-12475 (10/25/11) authorized replacement of the 10 MMscfd BS&B glycol dehydrator with a 5 MMscfd JW Williams dehydrator. The source ID remains F013B-D1. The waiver does not result in any changes to monitoring, recordkeeping or reporting in the operating permit. The modified operating permit is being issued as a minor modification.

The permit revisions include the following:

- Source Emission Points Table: references the replacement dehydrator and waiver wv-12475
- Total Facility Estimated Emissions: reflects reduced VOC and HAP emissions
- Condition F2: references the replacement dehydrator and updates the NO_x limit
- Condition F5: references the replacement dehydrator
- Subpart ZZZZ and condition C1(b)(iii) are updated to reflect current permit language
- The summary table references the replacement dehydrator and waiver wv-12475
