

## STATEMENT OF BASIS

To: Reviewers  
Through: Lori Bocchino, Operating Permit Program Manager  
From: Brian Fehr, Air Quality Engineer  
Subject: Draft Chapter 6, Section 3 Operating Permit 3-3-156-1, University of Wyoming, Heat Plant  
Date: November 20, 2013 *Addendum March 3, 2014*

Attached for your review is the draft modified Wyoming Air Quality Standards and Regulations (WAQSR) Chapter 6, Section 3 operating permit 3-3-156-1 for the University of Wyoming, Heat Plant. The operating permit is being modified to update applicable requirements that have changed since the issuance of permit 3-3-156 on August 27, 2012.

On March 28, 2012, the Air Quality Division updated WAQSR Chapter 14, Section 3 for the Sulfur Dioxide Milestone Inventory, to revise measurement techniques and baseline date language. The Heat Plant is subject to these requirements.

Chapter 6, Section 3(d)(vii) of Wyoming Air Quality Standards and Regulations (WAQSR) requires the Division of Air Quality to reopen the operating permit if additional applicable requirements under the Act become applicable to a source with a remaining permit term of 3 or more years. On October 18, 2013, the University of Wyoming was notified that the Division intended to reopen operating permit 3-3-156 to revise applicable requirements from WAQSR Chapter 14, Section 3.

The operating permit revisions include the following:

- Condition F15: revised to reflect current WAQSR Chapter 14, Section 3 baseline date requirements.
- 40 CFR63 Subpart ZZZZ: removed the erroneous reference to Appendix B.
- Condition S1 is updated to indicate current state ambient standards.

### *Addendum March 3, 2014*

*Condition F2(b) is modified to reflect recent changes to visible emission limits in WAQSR Chapter 3, Section 2 for diesel-fired engines. Additionally condition S1 is updated to include wording used in permits currently issued by the Division. These changes are administrative in nature and do not warrant an additional public notice period.*
