**RE: Termination of NOV 3962-06; 1331ET**

Dear Mark:

It has come to my attention that the DEQ has on file a notice of violation; docket number 3962-06 for Green River Rock. The violation was issued October 13, 2006 against the limited mining operation 1331ET for a disturbance of more than 10 acres. The violation was based on an inspection performed in September 2006 by Amy Boyle that showed a GPS measurement of 11.5 acres. The violation was also for topsoil not being salvaged properly at the site.

We are terminating this NOV due to the fact that Green River Rock is now operating under a large mine permit. The DEQ feels that the salvage of topsoil has been addressed and that subsequent topsoil salvage has been done more carefully.

Sincerely,

Diana Olson  
Geologist  
DEQ/Land Quality Division
