RE: Wyoming Underground Storage Tank Program
Quarterly Status Report (January 1, 2007 – March 30, 2007)

Dear Ms. Chambus:

BACKGROUND: The Wyoming Storage Tank Program (STP) regulates underground storage tanks (USTs) and aboveground storage tanks (ASTs). The definition of an UST is exactly the same as the federal definition. ASTs are defined as those aboveground storage tanks used by a fuel dealer to dispense gasoline and diesel to the public. The following table shows an overview of the STP in Wyoming:

	12/1/07	4/1/07
Total STP Facilities – Statewide Regardless of Status	3,812	3,812
Total Number of <i>Systems</i> of all types	10,466	10,473
Total Number of UST <i>Systems</i>	9,949	9,956
Total Number of AST <i>Systems</i>	517	517
Total Number of UST Facilities not Permanently Out of Use (POU)	771	772
Total Number of UST <i>Systems</i> not POU	2,066	2,017
Total Number of UST <i>Systems</i> Temporarily Out of Use (TOU)	138	149
Total Number of AST Facilities not POU	109	106
Total Number of AST <i>Systems</i> not POU	284	279
Total Number of AST <i>Systems</i> TOU	22	19
Total Number of Petroleum UST <i>Systems</i>	10,437	9,887
Total Number of Active Petroleum UST <i>Systems</i> (Not POU)	2,037	1,989
Total Number of Hazardous Substance UST <i>Systems</i>	29	29
Total Number of Active Hazardous Substance UST <i>Systems</i> (Not POU)	6	6

As you might expect, the total number of facilities, statewide, continues to slowly increase as older facilities are abandoned and new facilities are constructed, often on different sites. The total number of UST and AST facilities not POU continues a long-term trend as smaller facilities are abandoned and larger,

higher throughput stations, replace them. Often two or three older facilities go out of business when one new facility starts up. The number of total UST facilities and total UST systems both decreased sharply this year when the US Air Force removed 50 facilities and 55 systems at the Peacekeeper missile launch control facilities and launch facilities. These facilities were removed under the Strategic Arms Reduction Treaty (START II). The total number of TOU tanks remains about the same from year to year. As tanks are removed permanently, other tanks currently in use move to TOU status.

All USTs must have a leak detection method for the tanks and another one for all pressurized lines. All USTs must have spill prevention equipment and overfill prevention equipment. Suction lines that have no foot valve in the tank are exempt for all leak detection work and are referred to as safe suction or exempt suction. Suction lines with foot valves are required to be pressure tested every three years and are referred to as U.S. Suction or non-exempt suction. By far, most of the tanks in Wyoming are equipped with pressurized lines.

Owners and/or operators of ASTs are required to register their tanks and to pay an annual fee. ASTs that are used to dispense gasoline and diesel to the public are the only ones covered by the program and these owners receive all program benefits. House Bill 309 signed into law this year postpones the deadline to upgrade ASTs until October 1, 2008. The old deadline under Chapter 17 was October 1, 2007.

TANK AND CONTAMINATED SITE FEES: Tank fees and contaminated site fees are due July 1 of each year. Owners who do not pay by July 1 are not current with State of Wyoming Storage Tank Fees and thus are also not current with federal financial responsibility requirements. All 2,175 tank systems are subject to tank fees regardless of tank type. Owners of contaminated sites are also required to pay contaminated site fees to remain eligible for the state fund. As of April 1, 2007, the owners of 17 locations are overdue in paying the fees. This includes all fees whether tank fees, contaminated site fees, or installation fees. The following is a list of all facilities that are not current on STP fees:

CATHODIC PROTECTION TESTS: One of our most important requirements is to have every cathodic protection system inspected once every three years by a cathodic protection tester to insure that the steel tanks and/or lines are still being protected against corrosion. This is the only requirement in the tank program that is designed to prevent leaks before they occur. Cathodic protection can be provided by either a sacrificial anode (galvanic anodes) system or by an impressed current system.

There are 771 USTs in Wyoming that are protected against corrosion using *sacrificial anodes*. This number includes both CIU and TOU tanks. The TOU tanks were mistakenly left out of the last quarterly report. As of April 1, 2007, only 27 of these tanks had not been tested within the last 3 years. These tanks are located at 12 facilities. This is a 96.5% compliance rate.

Facility	Tank	Facility Name	Street Address	City	Date Last Tested
0-000061	4,5,7	El Camino Site	515 El Camino Road	Gillette	3/9/2004
0-000574	1,2,3,4	Farmers Cooperative	603 East Second Street	Gillette	5/1/2003
0-000655	5,6	Bear Mountain Service	West Route 77	Lagrange	5/28/2003
0-001156	7,8	Searle Brothers Construction	160 Pollux Drive	Rock Springs	3/19/2004

0-002955	1,2,3,4,5	Nancy's Handy Truck Stop	1559 McCue Street	Laramie	7/1/2001
0-003185	1,2,3,4,5	Stubb's Truck Stop	730 East Main	Lander	6/28/2001

All operators who have tests of either type of system due between now and May 1, 2007, have already been notified by letter stating the date when the next test is due.

TOU TANKS: Tanks can be placed in TOU status at any time, and they must be emptied within 1-inch of the bottom within 3 months of being placed in TOU status. Tanks that are TOU and empty are exempt from all leak detection requirements but not cathodic protection requirements. There are 149 USTs at 64 facilities that are TOU. Of these, all but 5 tanks are fully upgraded. The following is a list of all TOU USTs in Wyoming:

Facility	Tank	Facility Name	Street Address	City	Date Last Used

One of these facilities, Trailside General Store, was ordered to either inspect the tanks and put the cathodic protection system back into operation or remove the tanks. The owner, Brad Hall, has now agreed to remove the tanks. Administrative Orders are being prepared now against Powell Valley Oil Company and Ralston Food Mart because they are also past due on the cathodic protection test.

LINE PRESSURE TESTING: There are 1,450 lines in Wyoming that require testing: 1,415 pressurized lines and 35 U.S. suction lines. There are 97 pressurized lines that are overdue for testing, or an overall 93.3% compliance rate. The pressurized lines that are past due for testing are:

As you can see, many of these tests were due within the last 60 days. Many of them may have been done already, but the paperwork has not yet arrived at our office. Central Sinclair is known to be TOU, but the owner has not registered the tanks as TOU.

There are 35 U.S. Suction lines in Wyoming. Of these, there is 1 active U.S. Suction line at 1 facility that is past due on the 3-year pressure tests of the lines. This is a 97.1% compliance rate for this limited number of facilities. The facility that is not in compliance is:

Facility	Tank	Date Last Tested	Facility Name	Street Address	City
0-000215	2	12/22/2003	Fremont County School Dist #24	Eighth & Maple Streets	Shoshoni

INSPECTIONS: During the period, October 1, 2006, through March 31, 2007, The STP conducted 103 on-site inspections. The following is a list of all inspections:

Facility	Date	Type of Inspection

SIGNIFICANT OPERATIONAL COMPLIANCE MEASURE 1: The STP conducted 345 compliance inspections during the past 12 months. Since SOC Measures are to be calculated over the past 12 months, that is the number we are using to calculate percentage compliance. The STP identified 34 violations at 21 sites that fit the definition for Significant Operational Compliance Measure 1. This is a compliance rate of 93.9% for SOC-1. The following is a list of all such violations:

Facility	Facility Name	Street Address	City	Violation Date	Federal Citation	Description
0-000179	Sinclair Retail # 49005	820 West 16th Street	Cheyenne	12/13/2006	280.44(c)	Inadequate use of applicable tank release detection methods.
0-000198	Huckfeldt Trucking Co	480 West 19th Avenue	Torrington	4/21/2006	280.41(a)	Failure to monitor tanks at least every 30 days, if appropriate.
0-000255	Short Stop	10615 Highway 189	Marbleton	8/9/2006	280.44(a) 280.44(b)	Failure to provide adequate line leak detector system for underground piping. Failure to provide adequate line tightness testing system for underground piping system.
0-000458	Wyoming Beverages, Inc.	1470 Airport Road	Worland	6/12/2006	280.40(a)(2) 280.40(a)(1) 280.44(c) 280.45	Failure to install, calibrate, operate, or maintain release detection method in accordance with manufacturer's instructions. Failure to provide release detection method capable of detecting a release from tank or piping that routinely contains product. Inadequate use of applicable tank release detection methods. Failure to maintain any records of release detection monitoring.

0-004253	State Line Station	5930 Old Hwy 14	Beulah	5/17/2006	280.21(d)	Failure to provide overfill prevention system for an existing tank.
0-004326	Torrington Travel Terminal	1500 East Valley Highway 26	Torrington	2/13/2007	280.21(d)	Failure to provide overfill prevention system for an existing tank.

SIGNIFICANT OPERATIONAL COMPLIANCE MEASURE 3: During the past 12 months, the STP identified 54 violations at 39 sites that fit the definition for Significant Operational Compliance Measure 3. This is a compliance rate of 88.7% for SOC-3. Since SOC-3 is a combination of SOC-1 and SOC-2, the listing will not be repeated.

OPERATOR'S ANNUAL INSPECTIONS: When Chapter 17 was amended in 2005, a provision was placed in the rules that requires the operator of the station to conduct their own annual inspections. During an operator's annual inspection, the operator is required to complete all tasks this agency would do during a field inspection and to fully document the inspection in a report to the department. Since September 30, 2006, operators have conducted, documented, and reported 158 inspections. In some cases, the submitted reports did not include the last 12 months automatic tank gauging results and inventory control spreadsheets. When this happens, we are requesting this information in the same way that we would if the information was not at the facility during our own inspections.

CLEANUP OF CONTAMINATED SITES: At the present time, there are a total of 745 unresolved contaminated sites. Sites not in corrective action and not resolved total 409. Corrective action is underway at 336 sites. Counting the 43 sites cleaned up this federal fiscal year, 809 contaminated sites have already been resolved through our efforts. The following is a list of sites cleaned up this year:

Facility	Facility Name	Street Address	City	Project Name	Date Resolved
0-000136	Fort Java Outpost	895 Southwest Wyoming	Mills	NE Central LSSI	10/25/2006

ENFORCEMENT: The attached printout shows the status of every active Storage Tank Program enforcement case, and every enforcement case closed since October 1, 2006.

SUMMARY: At this time, the Wyoming Storage Tank Program has an excellent compliance rate. Corrective action is proceeding as quickly as possible, given the financial and technical constraints that we work under.

Sincerely,

Robert F. Lucht, P.E. & P.G.
Storage Tank Program Compliance Supervisor
Solid and Hazardous Waste Management Division

DATE OF ORDER: COURT DOCKET: 166-380
D.C. JUDGEMENT:
JUDGEMENT DATE: 11/1/2005

SYNOPSIS:

An Administrative Order 3006-98 was issued November 3, 1998, never appealed, affirmed by the Council. A second Administrative Order 3107-99 was issued August 16, 1999. Respondent never complied. A referral was issued to AG February 2004. Mr. Sewell removed the tanks August 3, 2004, but fees have not been paid. The site was placed on the contaminated site list after the tanks were removed. On August 24, 2005, the AG filed suit in the First Judicial District, Docket 166-380 for past tank fees and a penalty. A default Judgement was entered by the Court. Trying to collect the Judgement now, no progress to date.

ORDER ON CONSENT: JUDICIAL DISTRICT First - Laramie
DATE OF ORDER: COURT DOCKET: 167-524
D.C. JUDGEMENT:
JUDGEMENT DATE:

SYNOPSIS:

The attorney for other side is Phillip Nicolsen of Laramie. Mr. Nicolsen verbally agreed to bring this into compliance in October, 2003. Nothing was done by 12/19/03 and the case was assigned to John Burbridge, who wrote a letter to offer to settle the case June 29, 2005. John offered to settle if they would pay just \$2,400 of the \$10,000 in past tank fees. They would also have to remove the tanks within six months of signing such an agreement, perform a minimum site assessment, and pay the contaminated site fees if the site is found to be contaminated. Suit was filed 3/3/06 in the First Judicial District seeking only the payment of fees and a penalty, does not mention removal of the tanks. Suit names only Kelly Oil Company, a defunct corporation. Any judgement is likely to be uncollectable.

SYNOPSIS:

Debernardi Brothers responded to the NOV on May 10, 2005. Draft Settlement Agreement June 14, 2005 called for a \$6,000 penalty with half stayed pending compliance for three years. Settlement Agreement and penalty check received 7/21/05. Inspection conducted 7/26/05 showed that they are also not doing leak detection on the tanks. Settlement Agreement requires that they comply for three years or pay an additional \$3,500 penalty. The inspection report for 7/21/05 states that they must send documentation that they are doing leak detection by 10/3/2005.

 JUDGEMENT DATE:

SYNOPSIS:

Roger Ball Annuity Trust #1 owns Wrangler Petroleum in Jackson. One of the tanks is not directly connected to any of the dispensers. That tank has a pressurized line that pumps into another tank. A previous owner had this set up with an automatic line leak detector. When the leak detectors were tested in February, 2006 it was discovered that this leak detector had been removed. They are working on a solution now. We will probably fine them \$500 now with the rest stayed pending compliance. They responded June 6 with a letter stating that they are considering how to re-configure this system. I have not sent a draft settlement agreement yet.

 JUDGEMENT DATE:

SYNOPSIS:

This Notice of Violation was issued for failure to pay storage tank fees for active or temporarily out of use tanks. Talked to Ms. Martin in November, 2006. She said she sold out before the beginning of this FY. Sent a change of ownership form. Not yet returned. Apparently, Mr. and Mrs. Martin are involved in a lawsuit between themselves and the buyer of this facility, Laura K Harmon and Alma Harmon. The buyer has declared bankruptcy under Chapter 13, the Martins have petitioned for the bankruptcy to be dismissed on the grounds that the debtor does not meet the requirements for Chapter 13 bankruptcy. The Harmons never registered as having any ownership interest in this facility.

 JUDGEMENT DATE:

SYNOPSIS:

On the night of February 22, 2007, gasoline vapors were discovered inside nearby homes and a complaint was made to EPA. Upon investigation, it was discovered that a leak had occurred at a rate of about 1,700 gallons per month at the Big Horn CO-OP. This release should have been detected during a suspected release investigation when the inventory control records failed to balance for the second consecutive month. Instead, no investigation was done, and the release became a serious threat to public health and safety.

SYNOPSIS:

This Notice of Violation was issued for failure to pay storage tank fees for active tanks. Certified Letter came back undeliverable at least twice. Called both times, to get proper address. Bookepper gave me her home address. Sent again certified 11/17/06, again it was returned. Uinta County Sheriff's Office could not obtain service through the civil process procedures. Sent again certified on 12/27/06. Hopefully this will go through. Fees received 12/13/06. A Notice of Compliance will be issued.

SYNOPSIS:

Delta Airlines filed bankruptcy before the start of this state fiscal year. When we invoiced them for storage tank fees, they responded that they would not pay because of the bankruptcy. The agency wrote back stating clearly that these fees are on-going operational costs and thus are not dischargeable through the bankruptcy. Delta appealed the Order on the basis that they don't owe the fees. Natrona County International Airport has filed a change of ownership form for this site and paid the fees. This order was vacated 2/27/07.
