

Why Is This Required?

If I'm a small quantity hazardous waste generator (SQG), why do I have post certain specified information next to the telephone?

Requirement: The Wyoming Hazardous Waste Rules & Regulations (HWRR), Chapter 8, Hazardous Waste Generator Requirements, Section 3(e)(iv)(E)(II), requires that SQGs post the following information next to the telephone: name and phone number of the emergency coordinator, location of fire extinguishers, spill control equipment and a fire alarm (if necessary) and the phone number of the fire department if there is no fire alarm.

What's the problem? The photo below depicts the required information posted to the telephone nearest the hazardous waste storage area. Having the required emergency phone information available allows immediate responses to hazardous waste releases, explosions, fires, etc., thereby preventing contamination of the environment.
