RE: Wyoming Underground Storage Tank Program
Quarterly Status Report (March 31, 2007 –June 30, 2007)

Dear Ms. Chambus:

BACKGROUND: The Wyoming Storage Tank Program (STP) regulates underground storage tanks (USTs) and aboveground storage tanks (ASTs). The definition of an UST is exactly the same as the federal definition. ASTs are defined as those aboveground storage tanks used by a fuel dealer to dispense gasoline and diesel to the public. The following table shows an overview of the STP in Wyoming:

	4/1/07	7/1/07
Total STP Facilities – Statewide Regardless of Status	3,812	3,817
Total Number of <i>Systems</i> of all types	10,473	10,485
Total Number of UST <i>Systems</i>	9,956	9,965
Total Number of AST <i>Systems</i>	517	520
Total Number of UST Facilities not Permanently Out of Use (POU)	772	772
Total Number of UST <i>Systems</i> not POU	2,017	1,992
Total Number of UST <i>Systems</i> Temporarily Out of Use (TOU)	149	148
Total Number of AST Facilities not POU	106	102
Total Number of AST <i>Systems</i> not POU	279	265
Total Number of AST <i>Systems</i> TOU	19	23
Total Number of Petroleum UST <i>Systems</i>	9,887	9,895
Total Number of Active Petroleum UST <i>Systems</i> (Not POU)	1,989	1,984
Total Number of Hazardous Substance UST <i>Systems</i>	29	29
Total Number of Active Hazardous Substance UST <i>Systems</i> (Not POU)	6	6

As you might expect, the total number of facilities, statewide, continues to slowly increase as older facilities are abandoned and new facilities are constructed, often on different sites. The total number of UST and AST facilities not POU continues a long-term trend as smaller facilities are abandoned and larger,

higher throughput stations, replace them. Often two or three older facilities go out of business when one new facility starts up. The total number of TOU tanks remains about the same from quarter to quarter. As tanks are removed permanently, other tanks currently in use move to TOU status.

All USTs must have a leak detection method for the tanks and another one for all pressurized lines. All USTs must have spill prevention equipment and overflow prevention equipment. Suction lines that have no foot valve in the tank are exempt for all leak detection work and are referred to as safe suction or exempt suction. Suction lines with foot valves are required to be pressure tested every three years and are referred to as U.S. Suction or non-exempt suction. By far, most of the tanks in Wyoming are equipped with pressurized lines.

Owners and/or operators of ASTs are required to register their tanks and to pay an annual fee. ASTs that are used to dispense gasoline and diesel to the public are the only ones covered by the program and these owners receive all program benefits. House Bill 309, signed into law this year, postpones the deadline to upgrade ASTs until October 1, 2008.

TANK AND CONTAMINATED SITE FEES: Tank fees and contaminated site fees are due July 1 of each year. Owners who do not pay by July 1 are not current with State of Wyoming Storage Tank Fees and thus are also not current with federal financial responsibility requirements. All 2,257 tank systems are subject to tank fees regardless of tank type. Owners of contaminated sites are also required to pay contaminated site fees to remain eligible for the state fund. Storage Tank fees were due July 1, 2007. As of the writing of this report there are still \$77,450.00 in outstanding fees. Since the fees have just become overdue, the very lengthy list of those overdue will not be included.

CATHODIC PROTECTION TESTS: One of our most important requirements is to have every cathodic protection system inspected once every three years by a cathodic protection tester to insure that the steel tanks and/or lines are still being protected against corrosion. This is the only requirement in the tank program that is designed to prevent leaks before they occur. Cathodic protection can be provided by either a sacrificial anode (galvanic anodes) system or by an impressed current system.

There are 765 USTs in Wyoming that are protected against corrosion using *sacrificial anodes*. This number includes both Currently in Use (CIU) and TOU tanks. As of July 1, 2007, only 38 of these tanks had not been tested within the last 3 years. These tanks are located at 18 facilities. This is a 95.0% compliance rate.

Facility	Tank	Facility Name	Street Address	City	Date Last Tested

TOU TANKS: Tanks can be placed in TOU status at any time, and they must be emptied within 1-inch of the bottom within 3 months of being placed in TOU status. Tanks that are TOU and empty are exempt from all leak detection requirements but not cathodic protection requirements. There are 148 USTs at 64 facilities that are TOU. Of these, all but 5 tanks are fully upgraded. The following is a list of all TOU USTs in Wyoming:

0-005063	1,2	Jubilee	524 Front Street	Evanston	6/1/2006

A few of the above tanks have already been removed. They are still showing on the list because the final tank removal inspection and soil sampling has not yet been finalized.

Administrative Orders have been issued against Trailside General Store, Powell Valley Oil Company, Ralston Food Mart, and Nancy's Handy Truckstop because they are also past due on the cathodic protection test.

LINE PRESSURE TESTING: There are 1,451 lines in Wyoming that require testing: 1,416 pressurized lines and 35 U.S. suction lines. There are 233 pressurized lines that are overdue for testing, or an overall 83.7% compliance rate. The pressurized lines that are past due for testing are:

As you can see, many of these tests were due within the last 60 days. Many of them may have been done already, but the paperwork has not yet arrived at our office. Central Sinclair is known to be TOU, but the owner has not registered the tanks as TOU.

There are 35 U.S. Suction lines in Wyoming. Of these, there are 6 active U.S. Suction lines at 3 facilities that are past due on the 3-year pressure tests of the lines. This is an 82.9% compliance rate for this limited number of facilities. The facilities that are not in compliance are:

Facility	Tank	Date Last Tested	Facility Name	Street Address	City

SIGNIFICANT OPERATIONAL COMPLIANCE MEASURE 1: The STP conducted 311 compliance inspections during the past 12 months. Since SOC Measures are to be calculated over the past 12 months, that is the number we are using to calculate percentage compliance. The STP identified 49 violations at 35 sites that fit the definition for Significant Operational Compliance Measure 1. This is a compliance rate of 88.8% for SOC-1. The following is a list of all such violations:

Facility	Facility Name	Street Address	City	Event Date	Federal Citation	Description
0-000179	Sinclair Retail # 49005	820 West 16th Street	Cheyenne	12/13/2006	280.44(c)	Inadequate use of applicable tank release detection methods.
0-000255	Short Stop	10615 Highway 189	Marbleton	8/9/2006	280.44(a) 280.44(b)	Failure to provide adequate line leak detector system for underground piping. Failure to provide adequate line tightness testing system for underground piping system.
0-000466	Eastgate Travel Plaza	6985 Nugget Avenue	Evansville	6/7/2007	280.45(b) 280.45	Failure to maintain any results of sampling, testing, or monitoring for release detection for at least 1 year. Failure to maintain every record of release detection monitoring.
0-000470	Ty's Pitstop	104 Main Street	Lingle	2/16/2007	280.40(a)(1)	Failure to provide release detection method capable of detecting a release from tank or piping that routinely contains product.
0-000508	Red Eagle Food Store #18	1229 Brundage Lane (U.S. 14 and I90)	Sheridan	5/1/2007	280.45 280.41(a)	Failure to maintain every record of release detection monitoring. Failure to monitor tanks at least every 30 days, if appropriate.

Failure to notify state or local agency within 30 days of bringing an UST system into use. NOTE: Penalty limited to \$10,000/UST!

SIGNIFICANT OPERATIONAL COMPLIANCE MEASURE 3: During the past 12 months, the STP identified 74 violations at 59 sites that fit the definition for Significant Operational Compliance Measure 3. This is a compliance rate of 81.0% for SOC-3. Since SOC-3 is a combination of SOC-1 and SOC-2, the listing will not be repeated.

OPERATOR'S ANNUAL INSPECTIONS: When Chapter 17 was amended in 2005, a provision was placed in the rules that requires the operator of the station to conduct their own annual inspections. During an operator's annual inspection, the operator is required to complete all tasks this agency would do during a field inspection and to fully document the inspection in a report to the department. Since September 30, 2006, operators have conducted, documented, and reported 443 inspections. In some cases, the submitted reports did not include the last 12 months automatic tank gauging results and inventory control spreadsheets. When this happens, we are requesting this information in the same way that we would if the information was not at the facility during our own inspections.

CLEANUP OF CONTAMINATED SITES: At the present time, there are a total of 741 unresolved contaminated sites. Sites not in corrective action and not resolved total 407. Corrective action is underway at 334 sites. Counting the 46 sites cleaned up this federal fiscal year, 813 contaminated sites have already been resolved through our efforts. The following is a list of sites cleaned up this year:

Facility	Facility Name	Street Address	City	Project Name	Date Resolved

ENFORCEMENT: The attached printout shows the status of every active Storage Tank Program enforcement case, and every enforcement case closed since October 1, 2006.

SUMMARY: At this time, the Wyoming Storage Tank Program has an excellent compliance rate. Corrective action is proceeding as quickly as possible, given the financial and technical constraints that we work under.

Sincerely,

Robert F. Lucht, P.E. & P.G.
Storage Tank Program Compliance Supervisor
Solid and Hazardous Waste Management Division

DATE OF ORDER: COURT DOCKET: 166-380
D.C. JUDGEMENT:
JUDGEMENT DATE: 11/1/2005

SYNOPSIS:

An Administrative Order 3006-98 was issued November 3, 1998, never appealed, affirmed by the Council. A second Administrative Order 3107-99 was issued August 16, 1999. Respondent never complied. A referral was issued to AG February 2004. Mr. Sewell removed the tanks August 3, 2004, but fees have not been paid. The site was placed on the contaminated site list after the tanks were removed. On August 24, 2005, the AG filed suit in the First Judicial District, Docket 166-380 for past tank fees and a penalty. A default Judgement was entered by the Court. Trying to collect the Judgement now, no progress to date.

ORDER ON CONSENT: JUDICIAL DISTRICT First - Laramie
DATE OF ORDER: COURT DOCKET: 167-524
D.C. JUDGEMENT:
JUDGEMENT DATE:

SYNOPSIS:

The attorney for other side is Phillip Nicolsen of Laramie. Mr. Nicolsen verbally agreed to bring this into compliance in October, 2003. Nothing was done by 12/19/03 and the case was assigned to John Burbridge, who wrote a letter to offer to settle the case June 29, 2005. John offered to settle if they would pay just \$2,400 of the \$10,000 in past tank fees. They would also have to remove the tanks within six months of signing such an agreement, perform a minimum site assessment, and pay the contaminated site fees if the site is found to be contaminated. Suit was filed 3/3/06 in the First Judicial District seeking only the payment of fees and a penalty, does not mention removal of the tanks. Suit names only Kelly Oil Company, a defunct corporation. Any judgement is likely to be uncollectable.

 JUDGEMENT DATE:

SYNOPSIS:

Roger Ball Annuity Trust #1 owns Wrangler Petroleum in Jackson. One of the tanks is not directly connected to any of the dispensers. That tank has a pressurized line that pumps into another tank. A previous owner had this set up with an automatic line leak detector. When the leak detectors were tested in February, 2006 it was discovered that this leak detector had been removed. They are working on a solution now. We will probably fine them \$500 now with the rest stayed pending compliance. They responded June 6 with a letter stating that they are considering how to re-configure this system. I have not sent a draft settlement agreement yet.

 JUDGEMENT DATE:

SYNOPSIS:

This Notice of Violation was issued for failure to pay storage tank fees for active or temporarily out of use tanks. Talked to Ms. Martin in November, 2006. She said she sold out before the beginning of this FY. Sent a change of ownership form. Not yet returned. Apparently, Mr. and Mrs. Martin are involved in a lawsuit between themselves and the buyer of this facility, Laura K Harmon and Alma Harmon. The buyer has declared bankruptcy under Chapter 13, the Martins have petitioned for the bankruptcy to be dismissed on the grounds that the debtor does not meet the requirements for Chapter 13 bankruptcy. The Harmons never registered as having any ownership interest in this facility.

SYNOPSIS:

On the night of February 22, 2007, gasoline vapors were discovered inside nearby homes and a complaint was made to EPA. Upon investigation, it was discovered that a leak had occurred at a rate of about 1,700 gallons per month at the Big Horn CO-OP. This release should have been detected during a suspected release investigation when the inventory control records failed to balance for the second consecutive month. Instead, no investigation was done, and the release became a serious threat to public health and safety. H.W. Rassumsen is their Attorney. A Settlement Agreement has been signed.

SYNOPSIS:

This Notice of Violation was issued for failure to pay storage tank fees for active tanks. Certified Letter came back undeliverable at least twice. Called both times, to get proper address. Bookkeeper gave me her home address. Sent again certified 11/17/06, again it was returned. Uinta County Sheriff's Office could not obtain service through the civil process procedures. Sent again certified on 12/27/06. Hopefully this will go through. Fees received 12/13/06. A Notice of Compliance will be issued.

SYNOPSIS:

Delta Airlines filed bankruptcy before the start of this state fiscal year. When we invoiced them for storage tank fees, they responded that they would not pay because of the bankruptcy. The agency wrote back stating clearly that these fees are on-going operational costs and thus are not dischargeable through the bankruptcy. Delta appealed the Order on the basis that they don't owe the fees. Natrona County International Airport has filed a change of ownership form for this site and paid the fees. This order was vacated 2/27/07.
