STATE OF WYOMING PUBLIC NOTICE

Purpose of Public Notice

Operators of the facilities listed below have applied to the Department of Environmental Quality/Water Quality Division (DEQ/WQD) for permits to discharge wastewater into streams or other surface waters. After reviewing the applications and other information, the DEQ/WQD staff has determined that these discharges should be permitted. The proposed permits contain limitations and conditions that will assure that the state's surface water quality will be protected and fulfill the requirements of Sections 402 and 303 of the federal Clean Water Act.

The purpose of this notice is to invite your comments on these proposed permits before issuance. Questions regarding any of the proposed permits may be directed to Kathy Shreve (307-777-7093). Copies of the proposed permits will be available on our website at <http://deq.state.wy.us>. To object to any of the proposed permits, submit your comments in writing to Kathy Shreve, DEQ/WQD, 200 West 17th Street, 4th Floor, Cheyenne, WY 82002, or submit comments electronically using WDEQ's web site (see public notice posting) by the date shown below. If no permit comments are received by the date shown below, the permit will be issued as proposed. Upon request, a copy of the draft permit and other pertinent information is available at the address listed above. A complete copy of each permit file is retained electronically in the DEQ Cheyenne Office. Each permit file contains the proposed permit, application form, and other pertinent information.

Any interested person may submit written comments for a proposed permit and may request a public meeting. Public meeting requests shall be submitted in writing and shall indicate the party's interest and reasons why a meeting is warranted. If the administrator finds there is a significant degree of public interest they may facilitate such a public meeting. The DEQ/WQD will consider all comments when making final permit issuance or denial decisions and these decisions are appealable to the Wyoming Environmental Quality Council (EQC). All comments shall be received in writing or submitted through the comment form on the WDEQ's web site by the date listed below. Emailed comments shall not be accepted.

All Comments shall be received by Monday, October 18, 2021

This facility(ies) is a coal bed methane facility where groundwater is pumped from a coal bearing formation resulting in the release of methane from the coal bed. The permit authorizes groundwater surface discharge provided effluent quality complies with effluent limits established in the permit.
