RE: Brengle II Small Wastewater Facility, Permit # 04-401

Dear Mr. Brengle:

The above application for coverage under General Permit to Construct, Install, Modify or Operate a Small Wastewater Facility in accordance with Chapter 3 and Chapter 11, Part D, of the Wyoming Water Quality Rules and Regulations has been reviewed and is hereby approved. You are authorized to construct, install, or modify the facility in accordance with general permit and the materials submitted in your application package. Your attention is directed to the mandatory reporting requirements outlined in Part V, Section O. of the general permit.

If you have any questions please contact Dennis Lamb at 3030 Energy Lane, Casper, WY, 82604, (307) 473-3452. Thank you.

Sincerely,

Dennis Lamb  
NE District Supervisor  
DEQ/WQD

cc: IPS, Cheyenne

**DEPARTMENT OF ENVIRONMENTAL QUALITY  
STATE OF WYOMING  
UNDERGROUND INJECTION CONTROL PERMIT  
AUTHORIZATION TO DISCHARGE INTO UNDERGROUND RECEIVERS  
ISSUED UNDER CHAPTER 16, WATER QUALITY RULES AND REGULATIONS**

(X) New  
( ) Modified

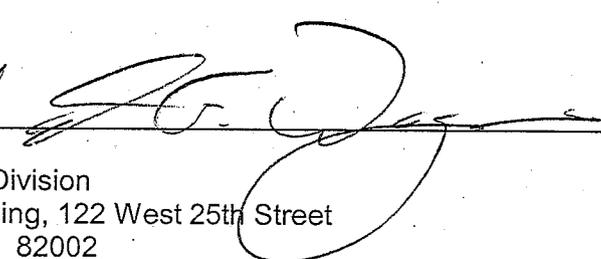

Permit Number: UIC 04-402  
Subclass Number: 5E3

In compliance with the Wyoming Environmental Quality Act (W.S. 35-11-101 through 1104, specifically 301(a)(i) through (iv), Laws 1973, Ch. 250, Section 1) and Water Quality Rules and Regulations, Chapter 3 (1988), and Chapter 16 (1998),

Applicant: Girl Scout Council of Wyoming  
P.O. Box 50307  
Casper, WY 82605  
ATTN: Ken Ball  
(307) 234-3472

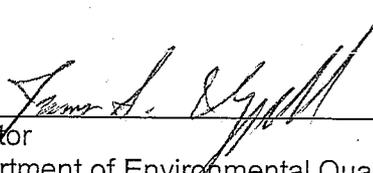

is authorized to operate the Camp Sacajawea Lodge Wastewater Facility in the NE¼, Section 19, Township 32 North, Range 79 West, Natrona County; according to the procedures and conditions of application # 04-402 and other conditions of this permit as contained on pages 1 through 8.

This permit shall become effective on date of issuance.

**A. DISCHARGE ZONE AND AREA OF REVIEW**

1. **Discharge Zone:**  
This injection facility (sanitary leachfield) is authorized to inject into an Alluvial/Fractured Granite Aquifer on Casper Mountain which is found at this location from 5 to 50 feet below the ground surface.
  
2. **Area of Review**  
The facility authorized by this permit is located in:  
  
Township 32 North, Range 79 West,  
Section 19: NE¼  
  
The Area of Review around this facility is legally described as:  
Township 32 North, Range 79 West,  
Section 19: NE¼

**B. GROUND WATER CLASSIFICATION**

1. The ground water in the Alluvial/Granite Aquifer on Casper Mountain is classified as class I (Domestic) under Chapter 8 of Wyoming Water Quality Rules and Regulations (March 11, 1993). This classification was made because:
  - a. The ground water in this formation is presumed to meet all of the quality standards set forth in Chapter 8 for class I water;
  - b. The ground water in this formation is currently being used for domestic purposes at several points of withdrawal; and
  
2. Ground water of class I shall not be degraded so as to make it unusable as a source of water for this purpose. Any parameters which do not meet the class of use standard shall not be degraded whatsoever.

**C. AUTHORIZED OPERATIONS**

1. The Girl Scout Council of Wyoming is authorized to inject 69 barrels per day, (2,900 gallons per day) of wastewater as described: Sanitary waste only from a summer camp lodge. The waste to be disposed of is to be treated first in a septic tank. The operator is authorized to inject at a pressure of no more than atmospheric pressure as measured at the leachfield. This pressure is controlled by gravity drainage and is not required to be monitored.

2. **Hazardous Waste** This permit does not allow for the injection of any hazardous waste as defined by 40 CFR 261. Injection of any substance defined as hazardous waste, whether hazardous by listing or by characteristic is a violation of this permit.

**D. ENVIRONMENTAL MONITORING PROGRAM FOR GROUND WATERS OF THE STATE**

1. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.
2. The Girl Scout Council of Wyoming shall prepare records of all monitoring information to be retained for a period of at least 3 years after closure of the facility.
3. Records of monitoring information shall include:
  - a. The date, exact place, and time of sampling or measurements;
  - b. The name(s) of individual(s) who performed the sampling or measurements;
  - c. The date(s) analyses were performed;
  - d. Names of individuals who performed the analyses;
  - e. The analytical techniques or methods used; and
  - f. The results of such analyses.
4. The ground water in the receiving formation shall be sampled and the following parameters analyzed on the following schedule and from the following wells.
5. The ground water in the receiving formation shall be sampled and the following parameters analyzed on the following schedule and from the following wells.

WELL NAME OR NUMBER	SAMPLING SCHEDULE	ANALYTICAL METHOD	PARAMETER ANALYZED	PERMIT LIMIT (UCL)*
Monitor Wells: Well #1 (drinking water well) Monitoring Well #2 Monitoring Well #3 (To be constructed)	Quarterly	EPA Method 350.3	Ammonia as N	.500
		EPA Method 300.0	Chloride	250
		EPA Method 353.2	Nitrate as N	10.0
		WDEQ/WQD. 2005. Manual of Standard Operating Procedures for Sample Collection and Analysis	e-coli	0 colony/100ml

\*All chemical concentrations in this permit are expressed in mg/l unless otherwise noted. Prior to taking the above samples, The Wyoming Girl Scout council shall monitor the static water level in monitor well #1 and Well #2. The results of those measurements shall be reported along with the sampling results.

6. After the first two years of operation, the Water Quality Division may, without reissuing this permit, waive further monitoring of any parameter from the above list or may require additional monitoring based on new information about the nature of the waste. The Water Quality Division may also, after the first two years of operation, approve a more or less stringent monitoring schedule.

**E. REQUIREMENTS FOR MONITORING THE DISCHARGE**

The Wyoming Girl Scout council will not be required to monitor the quality of the effluent from the septic tank at the point where the flow leaves the tank at this time. Future monitoring of the effluent may be required based on the results from the groundwater monitoring.

After the first two years of operation, the Water Quality Division may, without reissuing this permit, waive further monitoring of any parameter from the above list or may require additional monitoring based on new information about the nature of the waste. The Water Quality Division may also, after the first two years of operation, approve a more or less stringent monitoring schedule.

## **F. RECORDS AND REPORTS**

1. The Girl Scout Council of Wyoming shall retain copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least 3 years from the date of the report or application.
2. The Girl Scout Council of Wyoming shall give notice to the administrator as soon as possible of any planned physical alterations or additions, other than authorized operation and maintenance, to the permitted facility and receive authorization prior to implementing the proposed alteration or addition.
3. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than 30 days following each schedule date.
4. The Girl Scout Council of Wyoming shall report any noncompliance which may endanger health or the environment, orally within 24 hours from the time The operator becomes aware of the circumstances. The report should include:
  - a. Any monitoring or other information which indicates that any contaminant may cause an endangerment to a usable ground water of the state.
  - b. Any noncompliance with a permit condition or malfunction of the discharge (injection) system which may cause fluid migration into or between usable ground waters of the state.
  - c. A written submission shall be provided within 5 days of the time The operator becomes aware of the circumstances. This written submission shall contain a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected; the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.
5. The Girl Scout Council of Wyoming shall report all instances of noncompliance not reported otherwise, at the time monitoring reports are submitted; such reports shall contain the information listed in 4. above.
6. When the Girl Scout Council of Wyoming becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to the administrator, it shall promptly submit such facts or information.
7. The Girl Scout Council of Wyoming shall retain all records concerning the nature and composition of injected fluids until 5 years after completion of any specified plugging and abandonment procedures. The administrator may require the owner/operator to deliver the records to the administrator at the conclusion of the retention period.

8. A subsurface discharge (injection) facility may not commence subsurface discharge (injection) until, following public notice and an opportunity for hearing, an underground injection control permit has been issued by the department for the proposed operation.
9. The annual report of operations for this facility shall be submitted on forms provided by the department and shall include the following information:
  - a. Any permit exceedances within the previous year.
  - b. The analytical results for sampling for the injected water and any ground water sampling results required under Section D or E of this permit.
  - c. Annual reports are due in the Cheyenne office of the Water Quality Division no later than December 1 of each year.
10. A comprehensive report for an aborted or curtailed operation authorized by this permit shall be submitted to the administrator within 30 days of complete termination of the injection (discharge) or associated activity, in lieu of an annual report.

## **G. GENERAL PERMIT CONDITIONS**

1. After notice and opportunity for a hearing, a permit may be modified, suspended or revoked in whole or part during its term for cause which includes, but is not limited to, any of the following:
  - a. Violation of the permit;
  - b. Obtaining a permit by misrepresentation or failure of the discharge well or system.
2. Each permit is reviewed at least once every 5 years, and may be reviewed more frequently.
3. A permit may be modified at any time as may be required, including for conformity with changes in regulations or standards which occur after the permit is issued. A permit may be modified in whole or part in order to apply more, or less, stringent standards; or prohibitions for a toxic or other substance present in The Girl Scout Council of Wyoming 's discharge, as may be ordered by the council. This permit can be terminated by authority of the administrator for one or more permit violations.
4. Public notice of the permit review and request for public comment will be made every 10 years by the administrator.
5. Any permit noncompliance constitutes a violation of the permit and is grounds for enforcement action, permit termination, revocation, or modification.
6. The filing of a request by The Girl Scout Council of Wyoming for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition.
7. The owner/operator of record (permittee) is always responsible for permit compliance. A permit holder cannot transfer his permit without approval of the department director, and no such transfer will be approved if the facility is not in compliance with the existing permit unless the proposed permittee agrees to bring the facility into compliance.
8. Nothing in this permit shall be construed to preclude the institution of any legal action or relieve The C Scout Council of Wyoming from any responsibilities, liabilities or penalties established pursuant to any applicable state law or regulation.

9. The issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.
10. The provisions of this permit are severable, and if any provision of the permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.
11. Pollution or waste which migrates into an aquifer containing a usable ground water of the state is a violation of the permit.
12. This permit is for a term of ten years. If The Girl Scout Council of Wyoming wishes to continue injection after the expiration date of this permit, they will be required to apply to the Administrator for, and obtain, a new permit.
13. Any modification which may result in a violation of a permit condition shall be reported to the administrator, and any modification that will result in a violation of a permit condition shall be reported to the administrator through the submission of a new or amended permit application.
14. The injection facility covered by this permit shall meet the construction requirements found in Section 10 of Chapter 16, and Part D of Chapter 11, Water Quality Rules and Regulations. The permittee shall submit notice of completion or construction to the administrator and allow for inspection of the facility upon completion of construction prior to commencing any injection activity.
15. the permittee shall notify the administrator seven (7) days prior to conversion of this facility to any other use, or final abandonment of the facility.
16. Injection shall not commence until all construction is complete.

## **H. DUTIES OF THE PERMITTEE**

It is a duty of the permittee to:

1. Comply with all permit conditions;
2. Halt or reduce activity -- it shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce The Wyoming Girl Scout Council activity in order to maintain compliance with the permit conditions;
3. Take all reasonable steps to minimize or correct any adverse impact on the environment resulting from noncompliance with this permit; and
4. Furnish to the administrator within a reasonable time, any information which the administrator may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit; and furnish to the administrator, upon request, copies of records required to be kept by this permit.
5. Operate and maintain all facilities and systems of treatment and control which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance includes effective performance, adequate funding and operator staffing and training, and adequate laboratory and process controls including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of the permit.

6. Allow the administrator, or an authorized representative of the administrator, upon the presentation of credentials, during normal working hours, to enter the premises where a regulated facility is located, where records are kept under conditions of this permit, and inspect the discharge and related facilities, review and copy reports and records required by the permit, collect fluid samples for analysis, measure and record water levels, and perform any other function authorized by law or regulation.

**I. SPECIAL MEASURES THE DIRECTOR FINDS NECESSARY:**

1. In the event that sewage is found to be surfacing from the leachfield covered by this permit, this is a violation of this permit and shall be reported immediately as required by Section F of this permit. The Girl Scout Council of Wyoming shall submit a modified application showing plans for a replacement leachfield (or other type of waste disposal method) within 90 days of determining that the primary leachfield has failed.

**J. SIGNATORIES REQUIREMENT**

1. All reports required by this permit and other requested information shall be signed as follows:

For a corporation -- by a principal executive officer of at least the level of vice-president;

For a partnership or sole proprietorship -- by a general partner or the proprietor, respectively;

For a municipality, state, federal or other public agency -- by either a principal executive officer or ranking elected official; or

By a duly authorized representative for any of the above. A person is a duly authorized representative only if:

1. The authorization is made in writing by one of the described principals;
2. The authorization specifies either an individual or position having responsibility for the overall operation of the regulated facility or activity; and
3. The written authorization is submitted to the administrator.

2. If an authorization is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization must be submitted to the administrator prior to or together with any reports or information, to be signed by an authorized representative.

3. Any person signing a report or other requested information shall make the following certification:

"I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment."

STATEMENT OF BASIS FOR A UIC PERMIT

I. General Information.

A. Permit Number: UIC #04-402

B. Facilities Covered: This permit covers a new septic system to serve the Camp Sacajawea. This system is located on Casper Mountain, NE ¼, Section 19, Township 32 North, Range 79 West. Maximum flow to the system is expected to be 2,900 gallons per day.

C. Class of Facility: 5E3 (under Chapter 16)

II. Application reviewed for compliance with the following regulations.  
(Indicate yes or no for each section.)

A. Chapter 8    Yes

D. Chapter 12    No

B. Chapter 9    No

E. Chapter 13    No

C. Chapter 11    Yes

F. Chapter 16    Yes

III. Basis for issuing permit. (Indicate yes or no for each section)

A. Review of application package indicates proposed facility will be in compliance with applicable regulation identified in Section II.

YES

B. Permit based on deviation from applicable regulations in accordance with approved policy statement.

YES: System uses "Infiltrators" and is designed in accordance with Policy 13.41.2

IV. Facilities not specifically covered by regulations. (Indicate the section number of the regulations and briefly summarize the regulation.) NOT Applicable

V. Application requires review to determine groundwater impacts in accordance with Section 17, Chapter 3. Note that sediment ponds, public water supplies, sewerage systems, and small wastewater systems are exempt from the requirements of Section 17. (Indicate either applicable or not applicable. If not applicable delete all of section V. from the Statement of Basis.)

Applicable . The wastewater, up to 2,900 gallons per day, is generated by a lodge at a summer camp compound. A groundwater review has been done in accordance with Chapter 3, Section 17. Groundwater monitoring and effluent monitoring is required by the permit.

WYOMING DEPARTMENT OF ENVIRONMENTAL QUALITY  
WATER QUALITY DIVISION  
PERMIT TO CONSTRUCT

PERMIT NO. 04-404

City of Casper-Sunrise III Tank Improvements  
PWS# WY 5601415

This permit hereby authorizes the applicant:

City of Casper  
200 N. David  
Casper, Wyoming 82601

to construct, install or modify a water supply storage tank by retrofitting the inlet/outlet piping, repainting and general maintenance system with 2 finished water storage tanks and a 20" water line according to the procedures and conditions of the application number 04-404. The facility is located in NE/4 NE/4 of Section 32, Township 33 North, Range 79 West in the county of Natrona, in the State of Wyoming. All construction, installation, or modification allowed by this permit shall be completed by September 1, 2005.

The issuance of this permit confirms that the Wyoming Department of Environmental Quality (DEQ) has evaluated the application submitted by the permittee and determined that it meets minimum applicable construction and design standards. The compliance with construction standards and the operation and maintenance of the facility to meet the engineer's design are the responsibility of the permittee, owner, and operator.

Granting this permit does not imply that DEQ guarantees or ensures that the permitted facility, when constructed, will meet applicable discharge permit conditions or other effluent or operational requirements. Compliance with discharge standards remains the responsibility of the permittee.

Nothing in this permit constitutes an endorsement by DEQ of the construction or the design of the facility described herein. This permit verifies only that the submitted application meets the design and construction standards imposed by Wyoming statutes, rules and regulations. The DEQ assumes no liability for, and does not in any way guarantee or warrant the performance or operation of the permitted facility. The permittee, owner and operator are solely responsible for any liability arising from the construction or operation of the permitted facility. By issuing this permit, the State of Wyoming does not waive its sovereign immunity.

The permittee shall allow authorized representatives from DEQ to enter and inspect any property, premise or place on or at which the facility is located or is being constructed or installed for the purpose of investigating actual or potential sources of water pollution, and for determining compliance or non-compliance with any rules, regulations, standards, permits or orders.

Nothing in this permit shall be construed to preclude the institution of any legal action or other proceeding to enforce any applicable provision of law or rules and regulations. It is the duty of the permittee, owner and operator to comply with all applicable federal, state and local laws or regulations in the exercise of its activities authorized by this permit.

The issuance of this permit does not convey any property rights in either real or personal property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.

The permittee shall construct and operate the permitted facility in accordance with the statements, representations, procedures, terms and conditions of the permit application, supporting documents and permit. This permit does not relieve the permittee from any duty to obtain any other permit or authorization that may be required by any provision of federal, state or local laws.

In carrying out its activities authorized by this permit, the permittee, owner and operator shall comply with all of the following permit conditions:

1 of 3 The applicant will provide immediate oral or written notice to the DEQ/WQD Northeast District Office in accordance with the provisions of Section 11, Chapter 3, Wyoming Water Quality Rules and Regulations of any changes or modifications which are not consistent with the terms and conditions of this permit.

2 of 3 Within sixty days of completion of construction of the authorized facility, the applicant will submit to the DEQ/WQD Northeast District Office on the form provided (CERTIFICATION OF COMPLETION), the following information:

- a. Date that construction of the facility was completed; and
- b. Date that the facility was placed in operation; and
- c. Certification the facility was constructed in accordance with the terms and conditions of the permit; or
- d. Certification the facility was completed with changes or modifications. Submittal of as-constructed plans and specifications for the system as it was constructed, certified by an engineer if appropriate. All modifications or deviations from the authorized plans must be highlighted.

3 of 3 The review and approval of this permit is based upon the items identified in the attached "Statement of Basis".

## STATEMENT OF BASIS

1. Permit Number: 04-404
2. Application reviewed for compliance with the following applicable regulations :
  - a. Chapter 12.
3. Does the permit comply with all applicable regulations identified above?
  - a. Yes
4. Application requires review to determine groundwater impacts in accordance with Section 17, Chapter 3.  
  
Not Required
5. Documentation of Statement of Basis.

The archives file for this permit will include adequate documentation of all sections of this Statement of Basis.

## CERTIFICATION

The issuance of this permit is based upon a review of the application package submitted in accordance with the requirements of Section 6, Chapter III, Wyoming Water Quality Rules and Regulations. This review was performed by Dennis Lamb, Northeast District Supervisor, and completed on August 27, 2004. Permit issuance is recommended based upon statements, representations, and procedures presented in the permit application and supporting documents, permit conditions, and the items identified in this "Statement of Basis."

RE: WATERGY CBM Water Treatment Pilot Project/Skewed Reservoir Site, Permit #  
04-406

Dear Mr. Brant:

The above application for coverage under General Permit to Construct, Install, Modify or Operate a Pilot Plant in accordance with Section 5, Chapter 11, of the Wyoming Water Quality Rules and Regulations has been reviewed and is hereby approved. You are authorized to construct, install, or modify the facility in accordance with general permit and the materials submitted in your application package. Your attention is directed to the mandatory reporting requirements outlined in Part V, Section O. of the general permit. At a minimum a monthly report on the pilot plants operation including analytical data on the quality of the untreated and treated CBM water needs to be submitted to WDEQ/WQD.

The following items need to be submitted to WDEQ/WQD:

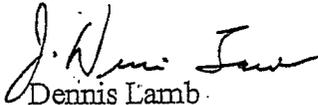

1. A topographic map showing the location of the pilot project facility;
2. A plan view schematic drawing of the completed pilot plant including the piping, pits, and discharge;
3. A complete description of the HCL storage and use at the site, including quantity stored, storage containers, venting on storage, MSDS, amount of acid released during the treatment and any measures taken to prevent fugitive emissions (scubbers, hoods, etc);

4. Site map of where the treated water is being land applied and landowner permission to land apply the water.

The permit application is being reviewed by WDEQ/Air Quality Division for compliance and permits that may be required. If there are any questions contact Chad Schlichtemeier in Cheyenne (307-777-5924).

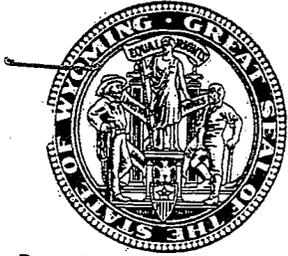

If you have any questions please contact Dennis Lamb at 3030 Energy Lane, Casper, WY, 82604, (307) 473-3452. Thank you.

Sincerely,

Dennis Lamb  
NE District Supervisor

RE: WATERGY CBM Water Treatment Pilot Project/Oxbow Reservoir Site, Permit #  
04-407

Dear Mr. Brant:

The above application for coverage under General Permit to Construct, Install, Modify or Operate a Pilot Plant in accordance with Section 5, Chapter 11, of the Wyoming Water Quality Rules and Regulations has been reviewed and is hereby approved. You are authorized to construct, install, or modify the facility in accordance with general permit and the materials submitted in your application package. Your attention is directed to the mandatory reporting requirements outlined in Part V, Section O. of the general permit. At a minimum a monthly report on the pilot plants operation including analytical data on the quality of the untreated and treated CBM water needs to be submitted to WDEQ/WQD.

The following items need to be submitted to WDEQ/WQD:

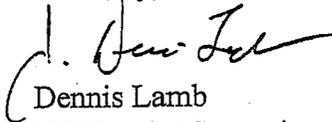

1. A topographic map showing the location of the pilot project facility;
2. A plan view schematic drawing of the completed pilot plant including the piping, pits, and discharge;
3. A complete description of the HCL storage and use at the site, including quantity stored, storage containers, venting on storage, MSDS, amount of acid released during the treatment and any measures taken to prevent fugitive emissions (scrubbers, hoods, etc);

4. Site map of where the treated water is being land applied and landowner permission to land apply the water.

The permit application is being reviewed by WDEQ/Air Quality Division for compliance and permits that may be required. If there are any questions contact Chad Schlichtemeier in Cheyenne (307-777-5924).

If you have any questions please contact Dennis Lamb at 3030 Energy Lane, Casper, WY, 82604, (307) 473-3452. Thank you.

Sincerely,

Dennis Lamb  
NE District Supervisor

WYOMING DEPARTMENT OF ENVIRONMENTAL QUALITY  
WATER QUALITY DIVISION  
PERMIT TO CONSTRUCT

PERMIT NO. 04-410

Star Valley Ranch Association - Green Canyon Pipeline  
PWS: WY5600287

This permit hereby authorizes the applicant:

Star Valley Ranch Association  
P.O. Box 159  
Thayne, WY83127

to construct, install or modify an existing water transmission line by replacing a pressure zeroing box, eliminating one pressure zeroing box, eliminating one air valve and vault, installing two combination valves in vaults, and installing one air relief valve in a vault according to the procedures and conditions of the application number 04-410. The facility is located in S1/2 Section 28 and S1/2 section 29, T35N, R118W in the county of Lincoln, in the State of Wyoming. All construction, installation, or modification allowed by this permit shall be completed by October 31, 2006.

The issuance of this permit confirms that the Wyoming Department of Environmental Quality (DEQ) has evaluated the application submitted by the permittee and determined that it meets minimum applicable construction and design standards. The compliance with construction standards and the operation and maintenance of the facility to meet the engineer's design are the responsibility of the permittee, owner, and operator.

Granting this permit does not imply that DEQ guarantees or ensures that the permitted facility, when constructed, will meet applicable discharge permit conditions or other effluent or operational requirements. Compliance with discharge standards remains the responsibility of the permittee.

Nothing in this permit constitutes an endorsement by DEQ of the construction or the design of the facility described herein. This permit verifies only that the submitted application meets the design and construction standards imposed by Wyoming statutes, rules and regulations. The DEQ assumes no liability for, and does not in any way guarantee or warrant the performance or operation of the permitted facility. The permittee, owner and operator are solely responsible for any liability arising from the construction or operation of the permitted facility. By issuing this permit, the State of Wyoming does not waive its sovereign immunity.

The permittee shall allow authorized representatives from DEQ to enter and inspect any property, premise or place on or at which the facility is located or is being constructed or installed for the purpose of investigating actual or potential sources of water pollution, and for determining compliance or non-compliance with any rules, regulations, standards, permits or orders.

Nothing in this permit shall be construed to preclude the institution of any legal action or other proceeding to enforce any applicable provision of law or rules and regulations. It is the duty of the permittee, owner and operator to comply with all applicable federal, state and local laws or regulations in the exercise of its activities authorized by this permit.

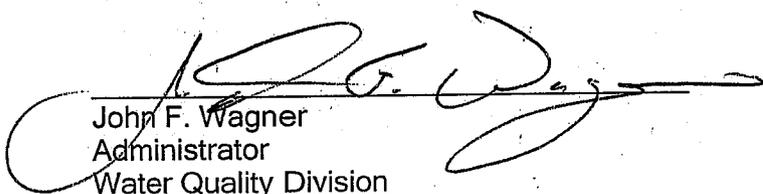

The issuance of this permit does not convey any property rights in either real or personal property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.

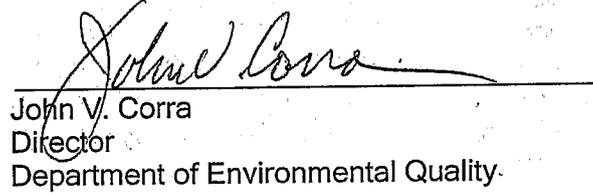

The permittee shall construct and operate the permitted facility in accordance with the statements, representations, procedures, terms and conditions of the permit application, supporting documents and permit. This permit does not relieve the permittee from any duty to obtain any other permit or authorization that may be required by any provision of federal, state or local laws.

In carrying out its activities authorized by this permit, the permittee, owner and operator shall comply with all of the following permit conditions:

- 1 of 3 The applicant will provide immediate oral or written notice to the Wyoming Department of Environmental Quality/ Water Quality Division, SW District, 250 Lincoln Street, Lander, WY 82520, 307-332-3144, fax 307-332-3183, in accordance with the provisions of Section 11, Chapter 3, Wyoming Water Quality Rules and Regulations of any changes or modifications which are not consistent with the terms and conditions of this permit.
  
- 2 of 3 Within sixty days of completion of construction of the authorized facility, the applicant will submit to the SW District a certification of completion signed by the Engineer of Record or the owner. A form titled "Certificate of Completion" has been provided.
  - a. Date that construction of the facility was completed; and
  - b. Date that the facility was placed in operation; and
  - c. Certification the facility was constructed in accordance with the terms and conditions of the permit; or
  - d. Certification the facility was completed with changes or modifications. Submittal of as-constructed plans and specifications for the system as it was constructed, certified by an engineer if appropriate is required. All modifications or deviations from the authorized plans must be highlighted.
  
- 3 of 3 The review and approval of this permit is based upon the items identified in the attached "Statement of Basis".

## STATEMENT OF BASIS

1. Permit Number: 04-410
2. Application reviewed for compliance with the following regulations :  
Chapter(s) 12 of the Wyoming Water Quality Rules and Regulations
3. Does the permit comply with all applicable regulations identified above?  
Yes
4. A review to determine groundwater impacts in accordance with Section 17, Chapter 3.  
Not required
5. Documentation of Statement of Basis: The archives file for this permit include adequate documentation of all sections of this Statement of Basis.

## CERTIFICATION

The issuance of this permit is based upon a review of the application package submitted in accordance with the requirements of Chapter 3, Section 6, Wyoming Water Quality Rules and Regulations. This review was performed by Doyle Conklin, [dconkl@state.wy.us](mailto:dconkl@state.wy.us), Southwest District Engineering Supervisor and completed on October 8, 2004. Permit issuance is recommended based upon statements, representations, and procedures presented in the permit application and supporting documents, permit conditions, and the items identified in this "Statement of Basis."

PERMIT NO. 04-415

REFERENCE PERMIT NO.

Riverton Wastewater Treatment Plant HVAC Upgrade

This permit hereby authorizes the applicant:

William Urbigit, Director Public Works  
City of Riverton  
816 N. Federal Blvd.  
Riverton, WY 82501

to install 4 replacement high efficient gas fired HV units for the head works building, two clarifiers and sludge pumping room according to the procedures and conditions of the application number 04-415. The facility is located in Sec. 36, T1N, R4E Wind River Meridan in the county of Fremont, in the State of Wyoming. All construction, installation, or modification allowed by this permit shall be completed by December 31, 2006.

The issuance of this permit confirms that the Wyoming Department of Environmental Quality (DEQ) has evaluated the application submitted by the permittee and determined that it meets minimum applicable construction and design standards. The compliance with construction standards and the operation and maintenance of the facility to meet the engineer's design are the responsibility of the permittee, owner, and operator.

Granting this permit does not imply that DEQ guarantees or ensures that the permitted facility, when constructed, will meet applicable discharge permit conditions or other effluent or operational requirements. Compliance with discharge standards remains the responsibility of the permittee.

Nothing in this permit constitutes an endorsement by DEQ of the construction or the design of the facility described herein. This permit verifies only that the submitted application meets the design and construction standards imposed by Wyoming statutes, rules and regulations. The DEQ assumes no liability for, and does not in any way guarantee or warrant the performance or operation of the permitted facility. The permittee, owner and operator are solely responsible for any liability arising from the construction or operation of the permitted facility. By issuing this permit, the State of Wyoming does not waive its sovereign immunity.

The permittee shall allow authorized representatives from DEQ to enter and inspect any property, premise or place on or at which the facility is located or is being constructed or installed for the purpose of investigating actual or potential sources of water pollution, and for determining compliance or non-compliance with any rules, regulations, standards, permits or orders.

Nothing in this permit shall be construed to preclude the institution of any legal action or other proceeding to enforce any applicable provision of law or rules and regulations. It is the duty of the permittee, owner and operator to comply with all applicable federal, state and local laws or regulations in the exercise of its activities authorized by this permit.

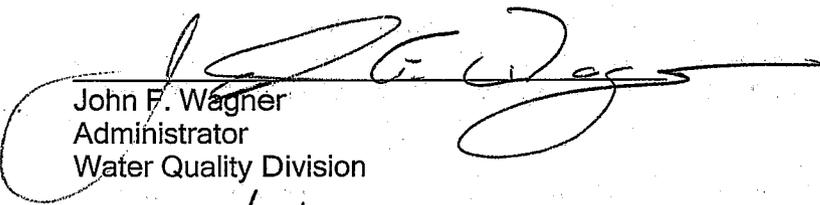

The issuance of this permit does not convey any property rights in either real or personal property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.

The permittee shall construct and operate the permitted facility in accordance with the statements, representations, procedures, terms and conditions of the permit application, supporting documents and permit. This permit does not relieve the permittee from any duty to obtain any other permit or authorization that may be required by any provision of federal, state or local laws.

In carrying out its activities authorized by this permit, the permittee, owner and operator shall comply with all of the following permit conditions:

- 1 of 3 The applicant will provide immediate oral or written notice to the Wyoming Department of Environmental Quality/ Water Quality Division, Northwest District, 250 Lincoln Street, Lander, WY 82520, 307-332-3144, fax 307-332-3183, in accordance with the provisions of Section 11, Chapter 3, Wyoming Water Quality Rules and Regulations of any changes or modifications which are not consistent with the terms and conditions of this permit.
- 2 of 3 Within sixty days of completion of construction of the authorized facility, the applicant will submit to the Northwest District a certification of completion signed by the Engineer of Record or the owner. A form titled "Certificate of Completion" has been provided.
  - a. Date that construction of the facility was completed; and
  - b. Date that the facility was placed in operation; and
  - c. Certification the facility was constructed in accordance with the terms and conditions of the permit; or
  - d. Certification the facility was completed with changes or modifications. Submittal of as-constructed plans and specifications for the system as it was constructed, certified by an engineer if appropriate is required. All modifications or deviations from the authorized plans must be highlighted.
- 3 of 3 The review and approval of this permit is based upon the items identified in the attached "Statement of Basis".

PERMIT TO CONSTRUCT

PERMIT NO. 04-416R

**ARCHIVES**

Scharen Subdivision Water System's As-Built Permit & Water System Improvements  
PWS NO. WY5600022

This permit hereby authorizes the applicant:

Joe & Mae Scharen  
Scharen Subdivision  
P.O. Box 87  
Fromberg, MT 58029

to install additional flushing hydrants, gate valves, and combination air release valves; and to remove existing Waterman Air Relief Valves (used for irrigation systems) for the as-built water distribution system and to permit this system that serves the Scharen Subdivision according to the procedures and conditions of the application number 04-416R. The facility is located at Section 10, T52N, R93W in the county of Big Horn, in the State of Wyoming. All construction, installation, or modification allowed by this permit shall be completed by December 13, 2006.

The issuance of this permit confirms that the Wyoming Department of Environmental Quality (DEQ) has evaluated the application submitted by the permittee and determined that it meets minimum applicable construction and design standards. The compliance with construction standards and the operation and maintenance of the facility to meet the engineer's design are the responsibility of the permittee, owner, and operator.

Granting this permit does not imply that DEQ guarantees or ensures that the permitted facility, when constructed, will meet applicable discharge permit conditions or other effluent or operational requirements. Compliance with discharge standards remains the responsibility of the permittee.

Nothing in this permit constitutes an endorsement by DEQ of the construction or the design of the facility described herein. This permit verifies only that the submitted application meets the design and construction standards imposed by Wyoming statutes, rules and regulations. The DEQ assumes no liability for, and does not in any way guarantee or warrant the performance or operation of the permitted facility. The permittee, owner and operator are solely responsible for any liability arising from the construction or operation of the permitted facility. By issuing this permit, the State of Wyoming does not waive its sovereign immunity.

The permittee shall allow authorized representatives from DEQ to enter and inspect any property, premise or place on or at which the facility is located or is being constructed or installed for the purpose of investigating actual or potential sources of water pollution, and for determining compliance or non-compliance with any rules, regulations, standards, permits or orders.

Nothing in this permit shall be construed to preclude the institution of any legal action or other proceeding to enforce any applicable provision of law or rules and regulations. It is the duty of the permittee, owner and operator to comply with all applicable federal, state and local laws or regulations in the exercise of its activities authorized by this permit.

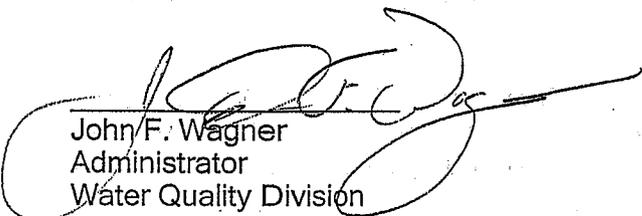

The issuance of this permit does not convey any property rights in either real or personal property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.

The permittee shall construct and operate the permitted facility in accordance with the statements, representations, procedures, terms and conditions of the permit application, supporting documents and permit. This permit does not relieve the permittee from any duty to obtain any other permit or authorization that may be required by any provision of federal, state or local laws.

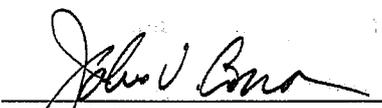

In carrying out its activities authorized by this permit, the permittee, owner and operator shall comply with all of the following permit conditions:

- 1 of 5 In accordance with Chapter 12, Section 14, dual check devices shall be installed on all existing and new residential connections. Please refer to Chapter 12, Section 14, Table 1 for the required backflow prevention devices that serve non-residential connections.
- 2 of 5 A pressure gauge must be installed on both the downstream and upstream sides of the pressure reducing valve located in the 10-foot diameter "big manhole."
- 3 of 5 The applicant will provide immediate oral or written notice to the Wyoming Department of Environmental Quality, Water Quality Division (WQD), Northwest District Engineer, 250 Lincoln Street, Lander, WY 82520, 307-332-3144, FAX 307-332-3183, in accordance with the provisions of Section 11, Chapter 3, Wyoming Water Quality Rules and Regulations of any changes or modifications which are not consistent with the terms and conditions of this permit.
- 4 of 5 Within sixty days of completion of construction of the authorized facility, the applicant will submit to the Northwest District a certification of completion signed by the Engineer of Record or the owner. A form titled "Certificate of Completion" has been provided.
  - a. Date that construction of the facility was completed; and
  - b. Date that the facility was placed in operation; and
  - c. Certification the facility was constructed in accordance with the terms and conditions of the permit; or
  - d. Certification the facility was completed with changes or modifications. Submittal of as-constructed plans and specifications for the system as it was constructed, certified by an engineer if appropriate is required. All modifications or deviations from the authorized plans must be highlighted.
- 5 of 5 The review and approval of this permit is based upon the items identified in the attached "Statement of Basis".

AUTHORIZED BY:

  
John F. Wagner  
Administrator  
Water Quality Division

12/15/04  
Date of Issuance

  
John V. Corra  
Director  
Department of Environmental Quality

## STATEMENT OF BASIS

1. Permit Number: 04-416R
2. Application reviewed for compliance with the following regulations:  
Chapters 3 and 12 of the Wyoming Water Quality Rules and Regulations, and PVC Pressure Pipe Policy 14.14.9 .[COMMENT3]
3. Does the permit comply with all applicable regulations identified above? No
4. Facilities include components not specifically covered by regulations and approval is based upon a deviation from applicable regulations in accordance with Section 5 of the applicable regulations.
  - a. Identify specific sections of the regulations for which a deviation is approved and briefly summarize the regulations.

The permit includes approval to deviate from the following regulatory requirements:

Per PVC Pressure Pipe Policy 14.14.9, all PVC pipe other than AWWA C900 pipe will be de-rated in accordance with the formula found in AWWA Standard C900. In short, the pressure class of the installed pipe is de-rated to 75 psi. Policy 14.14.9 also states "that all water distribution systems will use as a minimum 100 psi pressure class pipe" as determined by the de-rating.

- b. Briefly state the basis for the deviation.

It was noted that the above referenced formula from Policy 14.14.9 is calculate to provide a 2 feet per second surge allowance in addition to a 2.5 safety factor. A water surge is unlikely to occur at this system due to a flow control valve and the looping configuration of the distribution system. Thus, if the surge allowance is not considered, the ASTM Standard 2241, SDR 32.5, 125 psi pipe would be derated to 100 psi, rather than 75 psi.

5. If a Section 17 of Chapter 3 review is required indicate the basis for determining groundwater will be protected.  
Not Required.
6. Documentation of Statement of Basis: The archives' file for this permit includes adequate documentation of all sections of this Statement of Basis.

## CERTIFICATION

The issuance of this permit is based upon a review of the application package submitted in accordance with the requirements of Chapter 3, Section 6, Wyoming Water Quality Rules and Regulations. This review was performed by James S. Brough, [jbroug@state.wy.us](mailto:jbroug@state.wy.us), Environmental Engineer and completed on December 13, 2004. Permit issuance is recommended based upon statements, representations, and procedures presented in the permit application and supporting documents, permit conditions, and the items identified in this "Statement of Basis."

Re: Application Number 04-421

Dear Mr. Ewald:

I received a *Notification of Coverage* letter from you on August 20, 2004 to proceed with construction of a residential septic system for a new home construction project near Wheatland.

The purchase of the property we were involved with fell through in October and consequently the home was never built. You can disregard from your files permit application 04-421.

We have recently purchased property in another part of Platte County with the intentions of constructing a new home. An application to construct a small wastewater facility on this property is enclosed for your review.

Thank you for your assistance in this matter. If you have any questions please contact me at (307) 322-9060 or (307) 331-8607.

Sincerely,

  
Tim Becket

RE: Tim Beckett Residence Septic System,  
Location: SW 1/4, Section 08, T23N, R68W,

Application No. **04-421**  
Platte County

Dear Mr. Beckett:

The above application for coverage under General Permit to Construct, Install, Modify, or Operate a Small Wastewater Facility in accordance with Chapter 3, Section 9 of the Wyoming Water Quality Rules and Regulations has been reviewed and is hereby approved. You are authorized to construct, install, or modify the small wastewater system in accordance with Chapter 11, Part D of the Water Quality Division Rules and Regulations, the general permit, the condition listed below, and the materials submitted in your application package. Your attention is directed to the mandatory reporting requirements outlined in Part V, Section O of the general permit. Additionally, the following project specific condition also applies:

**Septic Tank Clean-Out Riser Requirement** - Either a 6 inch diameter clean-out riser or the manway from **each compartment of the tank** must be extended to the ground surface.

The approval granted under this Notification Of Coverage and the General Permit shall expire on August 20, 2006. Please reference Application Number **04-421** in any future correspondence.

## NOTIFICATION OF COVERAGE

September 1, 2004

Grace Zimmerschied  
300 Cabin Creek Road  
Carlisle, WY 82721

RE: Zimmerschied Septic System, Permit # 04-425

Dear Grace:

The above application for coverage under General Permit to Construct, Install, Modify or Operate extensions to or modifications of a small wastewater septic system in accordance with Chapter 3 and Chapter 11, Part B, of the Wyoming Water Quality Rules and Regulations (WWQRR) has been reviewed and is hereby approved. You are authorized to construct, install, or modify the facility in accordance with general permit and the materials submitted in your application package.

Your attention is directed to the mandatory reporting requirements outlined in Part V, Section O. of the general permit. **A minimum of two (2) photos of the system installation shall accompany the Certificate of Completion submitted to this office.** All construction, installation, or modification allowed by this permit shall be completed by September 1, 2005.

The test pit dug for confirmation of groundwater was only 8.5'. This is not a minimum of 4' below the proposed 5' deep leachfield trench. Please dig a test hole to a minimum depth of 9' before installing this system to verify that groundwater or bedrock is not present. Please submit photos of the excavation with the installation pictures and certificate of completion. No pictures were submitted with application as indicated in the original material.

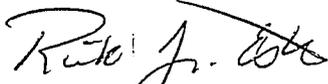

Please contact John Williams (283-2501) at the Crook County Natural Resource District office located at 117 S. 21<sup>st</sup> Street in Sundance before installing this system. Crook County now requires all septic systems to be inspected by Mr. Williams, effective September 1 of this year. As your application was received by WDEQ before this effective date, but permitted on the date, it is not known if your system will require inspection.

If you have any questions please contact me at 1866 S. Sheridan Avenue 673-9337, 673-2213 (fax).

Thank you

Sincerely,

WYOMING DEPARTMENT OF ENVIRONMENTAL QUALITY  
WATER QUALITY DIVISION  
PERMIT TO CONSTRUCT

PERMIT NO. 04-429RR

Reference Permit WYPDES NO. WY0052311

Sublette County -Wyoming Lodge- Sand Draw Industrial Park Subdivision  
New System No Public Water System Number Assigned

This permit hereby authorizes the applicant:

Gary Hauser - PTI  
Premium Camp Services  
3050 Parsons Road  
Edmonton, Alberta T6N1B1

to construct both public water supply and sewage collection and treatment systems to serve a 100 person mancamp, consisting of a water well, 9375 gallons finished water storage, booster pumps, stand by generator and distribution mains along with sewage collection mains and a package sewage treatment plant according to the procedures and conditions of the application number 04-429RR. The facility is located at SW 1/4, Section 32, T31N, R107W in the county of Sublette, in the State of Wyoming. All construction, installation, or modification allowed by this permit shall be completed by March 17, 2007.

The issuance of this permit confirms that the Wyoming Department of Environmental Quality (DEQ) has evaluated the application submitted by the permittee and determined that it meets minimum applicable construction and design standards. The compliance with construction standards and the operation and maintenance of the facility to meet the engineer's design are the responsibility of the permittee, owner, and operator.

Granting this permit does not imply that DEQ guarantees or ensures that the permitted facility, when constructed, will meet applicable discharge permit conditions or other effluent or operational requirements. Compliance with discharge standards remains the responsibility of the permittee.

Nothing in this permit constitutes an endorsement by DEQ of the construction or the design of the facility described herein. This permit verifies only that the submitted application meets the design and construction standards imposed by Wyoming statutes, rules and regulations. The DEQ assumes no liability for, and does not in any way guarantee or warrant the performance or operation of the permitted facility. The permittee, owner and operator are solely responsible for any liability arising from the construction or operation of the permitted facility. By issuing this permit, the State of Wyoming does not waive its sovereign immunity.

The permittee shall allow authorized representatives from DEQ to enter and inspect any property, premise or place on or at which the facility is located or is being constructed or installed for the purpose of investigating actual or potential sources of water pollution, and for determining compliance or non-compliance with any rules, regulations, standards, permits or orders.

Nothing in this permit shall be construed to preclude the institution of any legal action or other proceeding to enforce any applicable provision of law or rules and regulations. It is the duty of the permittee, owner and operator to comply with all applicable federal, state and local laws or regulations in the exercise of its activities authorized by this permit.

The issuance of this permit does not convey any property rights in either real or personal property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.

The permittee shall construct and operate the permitted facility in accordance with the statements, representations, procedures, terms and conditions of the permit application, supporting documents and permit. This permit does not relieve the permittee from any duty to obtain any other permit or authorization that may be required by any provision of federal, state or local laws.

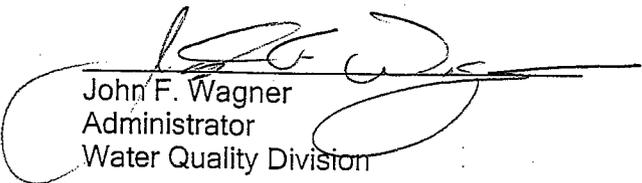

In carrying out its activities authorized by this permit, the permittee, owner and operator shall comply with all of the following permit conditions:

- 1 of 16 The applicant will provide immediate oral or written notice to the Wyoming Department of Environmental Quality, Water Quality Division (WQD), Northwest District Engineer, 250 Lincoln Street, Lander, WY 82520, 307-332-3144, FAX 307-332-3183, in accordance with the provisions of Section 11, Chapter 3, Wyoming Water Quality Rules and Regulations of any changes or modifications which are not consistent with the terms and conditions of this permit.
- 2 of 16 Within sixty days of completion of construction of the authorized facility, the applicant will submit to the Northwest District a certification of completion signed by the Engineer of Record or the owner. A form titled "Certificate of Completion" has been provided.
  - a. Date that construction of the facility was completed; and
  - b. Date that the facility was placed in operation; and
  - c. Certification the facility was constructed in accordance with the terms and conditions of the permit; or
  - d. Certification the facility was completed with changes or modifications. Submittal of as-constructed plans and specifications for the system as it was constructed, certified by an engineer if appropriate is required. All modifications or deviations from the authorized plans must be highlighted.
- 3 of 16 Water quality data such as that for bacteriological contaminants, inorganic contaminants (IOC), volatile organic contaminants (VOC), synthetic organic contaminants (SOC) and radionuclide contaminants must be submitted before the new water well is put into service. The well water quality must be in compliance with the United States Environmental Protection Agency (USEPA) National Primary Drinking Water Standards.
- 4 of 16 Chapter 12, Section 6 (c)(v)(A)(I) requires geological analysis of the aquifer to be submitted. Chapter 12, Section 10 (k)(ii)(C) requirements for contact time have been clarified by DEQ/WQD policy 14.10.1. Under Policy 14.10.1 the Wyoming DEQ uses the USEPA's Surface Water Treatment Rule. Since the proposed water well is to be drilled into a shallow aquifer there is the potential that the ground water would be under the direct influence of surface water and would require additional treatment. Therefore in addition to the required testing listed in condition 3 of 16 the geological analysis must indicate the source of the water. A second option to the geological analysis is to run a microscopic particle analysis (MPA) on the ground water in order that the level of water treatment can be determined or do a preliminary Ground Water Under Direct Influence Screening Assessment.
- 5 of 16 Chapter 11, Section 11(d)(i) requires that all sewage treatment plants shall have an alternative source of power. The alternative power source shall be sized to provide the capability to pump design maximum day flow rates through the treatment process and to

disinfect the sewage if necessary. Plans and specifications must be submitted for the alternative power source.

- 6 of 16 Chapter 12, Section 8 requires an alternative power source is to be provided for the finished water pumps (booster pumps) where the finished water storage volume that floats on the distribution is not capable of supplying the maximum daily demand. Plans and specifications must be submitted for the alternative power source.
- 7 of 16 Chapter 12, Section 9 (b)(A)(II) requires that water wells shall be disinfected in accordance with AWWA A-100.
- 8 of 16 Chapter 12, Section 9 (b)(D)(ii) requires yield and drawdown tests to be performed on water wells after construction.
- 9 of 16 Chapter 12, Section 9 (b)(B) requires that sources of pollution such as septic systems be identified and that the separation distance from the water well is to be indicated. Are there any sources of pollution such as septic systems on the adjacent lots?
- 10 of 16 Chapter 12, Section 8 (c)(ii) requires that groundwater supply facilities shall provide disinfection equipment and connections as a minimum. Plans and specifications must be submitted for the disinfection equipment.
- 11 of 16 Chapter 12, Section 9 (b)(iii)(D)(III)(1.) requires a means of measuring the flow from the water well.
- 12 of 16 Chapter 12, Section 9 (b)(iii)(D)(III)(1.) requires a means of pumping waste water from the well before it is discharged into the storage tank.
- 13 of 16 Chapter 12, Section 12 (q)(ii) requires that each booster pump have a standard pressure gage on the discharge line and a compound gage on the suction line.
- 14 of 16 Chapter 12, Section 13 (a)(iv & viii) requires that the finished water storage tank vent and overflow are to be covered with 24 mesh screens.
- 15 of 16 Operation and Maintenance manuals must be submitted for both the water supply and sewage treatment systems.
- 16 of 16 The review and approval of this permit is based upon the items identified in the attached "Statement of Basis"

Department of Environmental Quality

3/23/05  
Date of Issuance

MDB/mdb/jd/5-0341

## STATEMENT OF BASIS

1. Permit Number: 04-429RR
2. Application reviewed for compliance with the following regulations:  
Chapters 3,11 and 12 of the Wyoming Water Quality Rules and Regulations.
3. Does the permit comply with all applicable regulations identified above?  
Yes.
4. If a Section 17 of Chapter 3 review is required indicate the basis for determining groundwater will be protected.  
Not Required.
5. Documentation of Statement of Basis: The archives file for this permit include adequate documentation of all sections of this Statement of Basis.

## CERTIFICATION

The issuance of this permit is based upon a review of the application package submitted in accordance with the requirements of Chapter 3, Section 6, Wyoming Water Quality Rules and Regulations. This review was performed by Mark D. Baron, mbaron@state.wy.us, Environmental Senior Analyst and completed on March 17, 2005. Permit issuance is recommended based upon statements, representations, and procedures presented in the permit application and supporting documents, permit conditions, and the items identified in this "Statement of Basis."

WYOMING DEPARTMENT OF ENVIRONMENTAL QUALITY  
WATER QUALITY DIVISION  
PERMIT TO CONSTRUCT

PERMIT NO. 04-345

REFERENCE PERMIT NO. (98-429)

CAMBRIA PUMPING STATION NO.3 AND WATER PIPELINE  
PWS: 5601028

This permit hereby authorizes the applicant:

Cambria Improvement District  
23447 US Hwy 85  
Newcastle, WY, 82701

to install a booster station and new 4" water pipeline to serve an added pressure zone, Zone 2, in Pine Top Subdivision Lots 1-9 and also increase the pressure to Pine Top Subdivision Lots 10-13 to meet WDEQ requirements according to the procedures and conditions of the application number 04-345. The facility is located in the NE1/4 of Section 33 of Township 46 North, Range 61 West in the county of Weston, in the State of Wyoming. All construction, installation, or modification allowed by this permit shall be completed by July 1, 2005.

The issuance of this permit confirms that the Wyoming Department of Environmental Quality (DEQ) has evaluated the application submitted by the permittee and determined that it meets minimum applicable construction and design standards. The compliance with construction standards and the operation and maintenance of the facility to meet the engineer's design are the responsibility of the permittee, owner, and operator.

Granting this permit does not imply that DEQ guarantees or ensures that the permitted facility, when constructed, will meet applicable discharge permit conditions or other effluent or operational requirements. Compliance with discharge standards remains the responsibility of the permittee.

Nothing in this permit constitutes an endorsement by DEQ of the construction or the design of the facility described herein. This permit verifies only that the submitted application meets the design and construction standards imposed by Wyoming statutes, rules and regulations. The DEQ assumes no liability for, and does not in any way guarantee or warrant the performance or operation of the permitted facility. The permittee, owner and operator are solely responsible for any liability arising from the construction or operation of the permitted facility. By issuing this permit, the State of Wyoming does not waive its sovereign immunity.

The permittee shall allow authorized representatives from DEQ to enter and inspect any property, premise or place on or at which the facility is located or is being constructed or installed for the purpose of investigating actual or potential sources of water pollution, and for determining compliance or non-compliance with any rules, regulations, standards, permits or orders.

Nothing in this permit shall be construed to preclude the institution of any legal action or other proceeding to enforce any applicable provision of law or rules and regulations. It is the duty of the permittee, owner and operator to comply with all applicable federal, state and local laws or regulations in the exercise of its activities authorized by this permit.

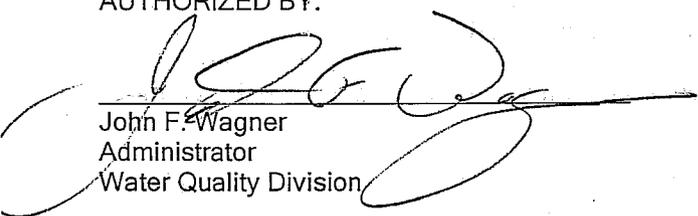

The issuance of this permit does not convey any property rights in either real or personal property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.

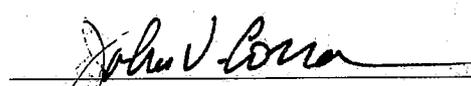

The permittee shall construct and operate the permitted facility in accordance with the statements, representations, procedures, terms and conditions of the permit application, supporting documents and permit. This permit does not relieve the permittee from any duty to obtain any other permit or authorization that may be required by any provision of federal, state or local laws.

In carrying out its activities authorized by this permit, the permittee, owner and operator shall comply with all of the following permit conditions:

- 1 of 5 The applicant will provide notification of the date that construction will begin (oral or written) to the WDEQ located at 1866 S. Sheridan Avenue, Sheridan, Wyoming 82801; telephone (307) 673-9337; FAX (307) 673-2213, or via email to Rick J. Estes restes1@state.wy.us.
- 2 of 5 The applicant will provide immediate oral or written notice to the WDEQ located at 1866 S. Sheridan Avenue, Sheridan, Wyoming 82801; telephone (307) 673-9337; FAX (307) 673-2213, in accordance with the provisions of Section 11, Chapter 3, Wyoming Water Quality Rules and Regulations of any changes or modifications which are not consistent with the terms and conditions of this permit.
- 3 of 5 Within sixty days of completion of construction of the authorized facility, the applicant will submit to the WDEQ located at 1866 S. Sheridan Avenue, Sheridan, Wyoming 82801; telephone (307) 673-9337; FAX (307) 673-2213 a certification of completion signed by the Engineer of Record or the owner. A form titled "Certificate of Completion" has been provided.
- a. Date that construction of the facility was completed; and
  - b. Date that the facility was placed in operation; and
  - c. Certification the facility was constructed in accordance with the terms and conditions of the permit; or
  - d. Certification the facility was completed with changes or modifications. Submittal of as-constructed plans and specifications for the system as it was constructed, certified by an engineer if appropriate is required. All modifications or deviations from the authorized plans must be highlighted.
- 4 of 5 This construction of this new pumping station will provide service for a total of 7 existing and 3 to 4 future taps on the 2" waterline. Additional capacity is planned for in the new 4" waterline, although an increase in pumping capacity will be required to add more demand to this pipeline. The pumping station has a peak capacity to serve 20 taps.
- 5 of 5 The review and approval of this permit is based upon the items identified in the attached "Statement of Basis".

Bob Hartley, PE, City of Newcastle, 10 W. Warwick, Newcastle, WY 82701

## STATEMENT OF BASIS

1. Permit Number: 04-345
2. Application reviewed for compliance with the following applicable regulations :  
Chapter 12 of the Wyoming Water Quality Rules and Regulations:
3. Does the permit comply with all applicable regulations identified above?  
  
The permit approval is based up on a deviation from applicable regulations in accordance with Section 5. of Chapter 12.
4. Facilities include components not specifically covered or differing from applicable regulations and approval is based upon a deviation in accordance with Section 5. (Include item 4. only if the permit approval is based upon a deviation in accordance with Section 5.)
  - a. Identify specific sections of the regulations for which a deviation is approved and briefly summarize the regulation.  
  
The permit includes approval to deviate from the following regulatory requirements:  
Section 8 (d) (iii)  
Alternative power source. Where the finished storage volume that floats on the distribution system is not capable of supplying the maximum daily demand, an alternative power shall be provided for the finished water pumps.....
  - b. Briefly state the basis for the deviation.  
  
The existing zone 1 storage reservoir is capable of serving the homes in zone 2 for a short period of time at minimum pressures of (15-20 psi) if the pumping station power failed. Therefore alternative power is not required for the zone 2 booster station.
5. A review to determine groundwater impacts in accordance with Section 17, Chapter 3 was  
  
Not Required
6. Documentation of Statement of Basis: The archives file for this permit include adequate documentation of all sections of this Statement of Basis.

## CERTIFICATION

The issuance of this permit is based upon a review of the application package submitted in accordance with the requirements of Chapter 3, Section 6, Wyoming Water Quality Rules and Regulations. This review was performed by Rick J. Estes, PE, restes1@state.wy.us, Northeast District Senior Environmental Analyst, and completed on February 2, 2005. Permit issuance is recommended based upon statements, representations, and procedures presented in the permit-application and supporting documents, permit conditions, and the items identified in this "Statement of Basis."

WYOMING DEPARTMENT OF ENVIRONMENTAL QUALITY  
WATER QUALITY DIVISION  
PERMIT TO CONSTRUCT

PERMIT NO. 04-437R

Northwest College  
No PWS # Assigned

This permit hereby authorizes the applicant:

Kim R. Mills, Interim Dean of Administration  
Northwest College  
2331 West 6th St  
Powell, WY 82435

to develop the Homestead Spring as a potential drinking water supply for Northwest College's field camp, according to the procedures and conditions of the application number 04-437R. The facility is located at SE1/4 Section 27, T55N, R104W in the county of Park, in the State of Wyoming. All construction, installation, or modification allowed by this permit shall be completed by November 2, 2006.

The issuance of this permit confirms that the Wyoming Department of Environmental Quality (DEQ) has evaluated the application submitted by the permittee and determined that it meets minimum applicable construction and design standards. The compliance with construction standards and the operation and maintenance of the facility to meet the engineer's design are the responsibility of the permittee, owner, and operator.

Granting this permit does not imply that DEQ guarantees or ensures that the permitted facility, when constructed, will meet applicable discharge permit conditions or other effluent or operational requirements. Compliance with discharge standards remains the responsibility of the permittee.

Nothing in this permit constitutes an endorsement by DEQ of the construction or the design of the facility described herein. This permit verifies only that the submitted application meets the design and construction standards imposed by Wyoming statutes, rules and regulations. The DEQ assumes no liability for, and does not in any way guarantee or warrant the performance or operation of the permitted facility. The permittee, owner and operator are solely responsible for any liability arising from the construction or operation of the permitted facility. By issuing this permit, the State of Wyoming does not waive its sovereign immunity.

The permittee shall allow authorized representatives from DEQ to enter and inspect any property, premise or place on or at which the facility is located or is being constructed or installed for the purpose of investigating actual or potential sources of water pollution, and for determining compliance or non-compliance with any rules, regulations, standards, permits or orders.

Nothing in this permit shall be construed to preclude the institution of any legal action or other proceeding to enforce any applicable provision of law or rules and regulations. It is the duty of the permittee, owner and operator to comply with all applicable federal, state and local laws or regulations in the exercise of its activities authorized by this permit.

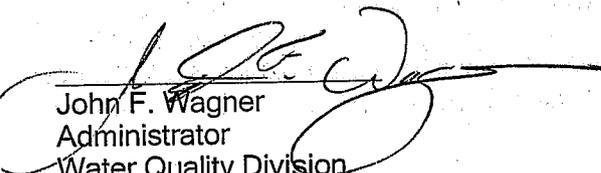

The issuance of this permit does not convey any property rights in either real or personal property or any invasion of personal rights, or any infringement of federal, state or local laws or regulations

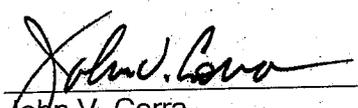

The permittee shall construct and operate the permitted facility in accordance with the statements, representations, procedures, terms and conditions of the permit application, supporting documents and permit. This permit does not relieve the permittee from any duty to obtain any other permit or authorization that may be required by any provision federal, state or local laws.

In carrying out its activities authorized by this permit, the permittee, owner and operator shall comply with all of the following permit conditions:

- 1 of 3 The applicant will provide immediate oral or written notice to the Wyoming Department of Environmental Quality, Water Quality Division (WQD), Northwest District Engineer, 250 Lincoln Street, Lander, WY 82520, 307-332-3144, FAX 307-332-3183, in accordance with the provisions of Section 11, Chapter 3, Wyoming Water Quality Rules and Regulations of any changes or modifications which are not consistent with the terms and conditions of this permit.
- 2 of 3 Within sixty days of completion of construction of the authorized facility, the applicant will submit to the Northwest District a certification of completion signed by the Engineer of Record or the owner. A form titled "Certificate of Completion" has been provided.
- a. Date that construction of the facility was completed; and
  - b. Date that the facility was placed in operation; and
  - c. Certification the facility was constructed in accordance with the terms and conditions of the permit; or
  - d. Certification the facility was completed with changes or modifications. Submittal of as-constructed plans and specifications for the system as it was constructed, certified by an engineer if appropriate is required. All modifications or deviations from the authorized plans must be highlighted.
- 3 of 3 The review and approval of this permit is based upon the items identified in the attached "Statement of Basis".

2. Application reviewed for compliance with the following regulations:  
Chapters 3 and 12 of the Wyoming Water Quality Rules and Regulations.
3. Does the permit comply with all applicable regulations identified above?  
The approval is based upon a deviation from applicable regulations in accordance with Section 5 of Chapter 12.
4. Facilities include components not specifically covered by regulations and approval is based upon a deviation from applicable regulations in accordance with Section 5 of the applicable regulations.
  - a. Identify specific sections of the regulations for which a deviation is approved and briefly summarize the regulations.  
Chapter 12, Section 9 does not contain requirements for the development of springs for public drinking water system's sources.
  - b. Briefly state the basis for the deviation.  
Best engineering practices to protect the water quality of the spring source involves the placement of an impervious, synthetic liner, placement of two-feet of soil cover, and the utilization of NSF 61 certified materials.
5. If Section 17 of Chapter 3 review is required indicate the basis for determining groundwater will be protected.  
Not Required
6. Documentation of Statement of Basis: The archives file for this permit includes adequate documentation of all sections of this Statement of Basis.

## CERTIFICATION

The issuance of this permit is based upon a review of the application package submitted in accordance with the requirements of Chapter 3, Section 6, Wyoming Water Quality Rules and Regulations. This review was performed by James S. Brough, [jbroug@state.wy.us](mailto:jbroug@state.wy.us), Environmental Senior Analyst and completed on November 2, 2004. Permit issuance is recommended based upon statements, representations, and procedures presented in the permit application and supporting documents, permit conditions, and the items identified in this "Statement of Basis."

## NOTIFICATION OF COVERAGE

September 23, 2004

Mr. W.P. Greaser  
Albany Realty LLC  
1267 15th Street, Suite 101  
Laramie, WY 82072

RE: Laramie Lots 1 & 2, Block 1 Reynolds Crossing Water Line Extension, Application No.04-438,  
Albany County

Dear Mr. Greaser:

The above application for coverage under General Permit to Construct, Install, Modify, or Operate Extensions to or Modifications of Existing Public Water Supply Distribution Systems described as 450 ft of 8" diameter PVC water main, 4" service line, fire hydrant, and all necessary appurtenances, W ½ Section 27 T16N R73W; Albany County, in accordance with Chapter 3, Section 9 of the Wyoming Water Quality Rules and Regulations has been reviewed and is hereby approved. You are authorized to construct, install, or modify the water distribution system in accordance with Chapter 12, Section 14 of the Water Quality Division Rules and Regulations, the general permit and the materials submitted in your application package. All service connections will be protected by the appropriate backflow device as required by Chapter 12, Section 14(I) of the Water Quality Division Rules and Regulations. All construction, installation, or modification allowed by this notification of coverage shall be completed by May 10, 2007.

Your attention is directed to the mandatory reporting requirements outlined in Part V, Section O of the general permit. Please reference Application No. 04-438 in any future correspondence.

If you have any questions, please contact me at 307-777-7088.

RE: Trease Residential Septic System, Application No. 04-439  
Location: SW1/4 NW1/4, Section 5, T14N, R83W, Carbon County

Dear Mr. & Mrs. Trease:

The above application for coverage under General Permit to Construct, Install, Modify or Operate a Small Wastewater Facility in accordance with Chapter 3, Section 9 of the Wyoming Water Quality Rules and Regulations has been reviewed and is hereby approved. You are authorized to construct, install or modify the small wastewater system in accordance with Chapter 11, Part D of the Water Quality Division Rules and Regulations, the general permit, the conditions listed below, and the materials submitted in your application package. Your attention is directed to the mandatory reporting requirements outlined in Part V, Section O of the general permit. Additionally, the following project specific conditions also apply:

1. Leachfield Header Layout - The effluent line from the septic tank to the leachfield header pipe shall be laid out as sketched on the "Site Plan" sheet. It shall not connect by a "Tee" to the corner of the leachfield as originally shown on the site plan.
2. Polyethylene Septic Tank Installation Requirements - To ensure structural integrity, the **manufacturer's instructions** regarding bedding the tank and filling the tank with water during burial **must be followed during installation**. Additionally, immediately after clean-outs, the tank must be refilled with water according to the manufacturer's instructions to maintain structural integrity.

## NOTIFICATION OF COVERAGE

September 21, 2004

Brent & Sue Lee  
Box 344  
Baggs, Wyoming 82321

RE: Lee House Septic - 04, Application No. 04-442  
Location: NE 1/4 SE 1/4, Section 7, T12N, R91W, Carbon  
County

Dear Mr. & Mrs. Lee:

The above application for coverage under General Permit to Construct, Install, Modify or Operate a Small Wastewater Facility in accordance with Chapter 3, Section 9 of the Wyoming Water Quality Rules and Regulations has been reviewed and is hereby approved. You are authorized to construct, install or modify the small wastewater system in accordance with Chapter 11, Part D of the Water Quality Division Rules and Regulations, the general permit, the conditions listed below, and the materials submitted in your application package. Your attention is directed to the mandatory reporting requirements outlined in Part V, Section O of the general permit. Additionally, the following project specific conditions also apply:

1. Septic Tank Clean-Out Riser Requirement - Either a 6 inch diameter clean-out riser or the manway from **each compartment of the tank** must be extended to the ground surface.
2. Leachfield Header/Splitter layout - The header pipes across the head of the leachfield which splits the outflow from the septic tank into four lines shall be laid out using tees to split the flow into four equal branches as shown on the Site Plan included and the **Four Trench Chambered Leachfield** detail sheet. The header pipe arrangement as originally submitted on the site plan using a 4-way cross fitting will not provide equal flow to each of the four legs of the leachfield.
3. Minimum Leachfield Size Requirement - The application package submitted calculates that a minimum of 42 sections of the "High Capacity Infiltrator" chambers are required, and also states that 44 sections will be used (which would be 11 per trench). However, the site plan shows unequal length trenches of 50 feet (8 sections), 54 feet (9 sections), 63 feet (10 sections), and 75 feet (12 sections) - for a total of only 39 sections. The four trenches should all be of equal length, and at 11 sections each that would be 69 feet long. Therefore, at a minimum, there shall be four equal trenches of at least 69 feet long to ensure relatively equal distribution of the effluent.

## LAND APPLICATION PERMIT

New  
 Renewal  
 Modified

PERMIT NO. 04-446  
SPECIAL CONDITIONS  
REF/PERMIT #02-272

This permit hereby authorizes the applicant:

Nelson Brothers, LLC  
820 Shades Creek Parkway, Suite 2000  
Birmingham, Alabama 35209

to land apply plant and vehicle wash water and boiler blow down water according to the procedures and conditions of the application number 04-446. The application site is located in Section 36, T48N, R71W in the county of Campbell, in the State of Wyoming. This permit shall be effective until November 1, 2006.

The issuance of this permit confirms that the Department of Environmental Quality (DEQ) has evaluated the application submitted by the permittee and determined that it meets minimum applicable standards. Compliance with DEQ standards is the responsibility of the permittee, owner, and/or operator.

Nothing in this permit constitutes an endorsement by the DEQ of the land application described herein. This permit verifies only that the submitted application meets the standards imposed by the DEQ statutes, rules and regulations. The DEQ assumes no liability for, and does not in any way guarantee or warrant the performance of, the permitted activity. The permittee, owner and/or operator are solely responsible for any liability arising from the land application. Issuing this permit, the state does not waive its sovereign immunity.

The permittee shall allow authorized representatives from the DEQ, Water Quality Division (WQD), upon the presentation of credentials and during working hours, to have access to inspect the facilities, at the above location, for the purpose of compliance with the provisions of this construction permit.

Nothing in this permit shall be construed to preclude the institution of any legal action or other proceeding to enforce any applicable provision of law or rules and regulations. It is the duty of the permittee, owner and/or operator to comply with all applicable federal, state and local laws or regulations in the exercise of its activities authorized by this permit.

The issuance of this permit does not convey any property rights in either real or personal property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.

The permittee shall construct and operate the permitted facility in accordance with the statements, representations, procedures, terms and conditions of the permit application, supporting documents and permit. This permit does not relieve the permittee from any duty to obtain any other permit or authorization that may be required by any provision of federal, state or local laws.

In carrying out its activities authorized by this permit, the permittee, owner and/or operator shall comply with all of the following permit conditions:

- 1 of 5. The permittee shall notify representatives from the DEQ/WQD of the anticipated project commencement and completion dates with the attached post card. At least 48 hours advance notice is required. The authorized representative in your area can be contacted at the following address: DEQ/WQD, Casper WDEQ Field Office, 3030 Energy Lane, Casper, WY 82604, telephone (307) 473-3452; FAX (307) 473-3458.
- 2 of 5. The permittee shall provide immediate oral and/or written notice to the Casper WDEQ Field Office in accordance with the provisions of Section 9, Chapter III, Wyoming Water Quality Rules and Regulations of any changes or modifications to the approved permit package.

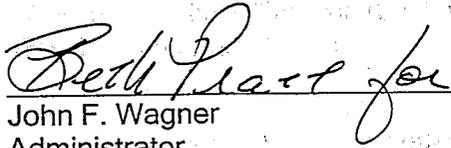

3 of 5. The permittee shall provide certification that the project was completed in accordance with the terms and conditions of the permit within sixty (60) days of the project completion to the Casper WDEQ Field Office on the attached Certification of Completion form.

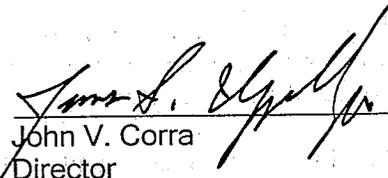

- a. Date that the land application was completed; and
- b. Certification the land application was done in accordance with the terms and conditions of the permit; or
- c. Certification the land application was completed with changes or modifications. Submit the information necessary to clearly indicate the land application as actually performed. This information shall include a contour map depicting only those sections that actually received wastewater.

4 of 5. The review and approval of this permit is based upon the items identified in the attached Statement of Basis.

5 of 5. Waste water application shall be terminated within 300 feet of the definable high water Mark of perennial and intermittent drainages, irrigation canals, lakes and reservoirs.

## STATEMENT OF BASIS

### General information.

A. Permit Number: 04-446

### II. Application reviewed for compliance with the following regulations. (Indicate yes or no for each section.)

A. Chapter XI. No

B. Chapter XII. No

### III. Basis for issuing permit. (Indicate yes or no for each section.)

A. Review of application package indicates proposed facility will be in compliance with applicable regulations identified in Section II.

No

B. Permit includes deviation from applicable regulations in accordance with Section 5, Chapter XI, or XII.

No

C. Permit based on deviation from applicable regulations in accordance with approved policy statement.

No

### Facilities not specifically covered by regulations. (Indicate the section number of the regulations and briefly summarize the regulation.)

A. Identify specific sections of the regulations for which a deviation is approved and briefly summarize the regulation.

There are no numeric standards or criteria in Chapter XI for road application. W.S. 35-11-301 (a)(iii) requires a permit to be issued when any disposal system capable of causing or contributing to pollution is constructed, installed, modified, or operated.

B. Briefly state the basis for the deviation.

Road application is permitted when DEQ authorized disposal facilities are not readily available, a beneficial use of the waste to be applied is possible, and significant impact to waters of the State is minimized.

C. Permit based on general or statewide deviation contained in approved policy statement (indicate the policy number and briefly summarize the nature of the deviation).

District Policy numbers 10.1 (4/9/91), 10.2 (10/17/86), 10.3 (8/91), 10.4 (10/24/91), and 10.6 (1/18/91) address the statutory authority to regulate the road application of waste, establish criteria for characterizing the waste, and determine acceptable conditions for the application of the waste to roadbeds to minimize impact to waters of the State. District Policy 10.2 (10/17/86).

V. Application requires review to determine groundwater impacts in accordance with Section 17, Chapter 3<sup>1</sup>. (Indicate either applicable or not applicable. If not applicable delete all of section VI. from the Statement of Basis.)

NA

---

<sup>1</sup>Sediment ponds, public water supplies, sewerage systems and small wastewater systems are exempt from the requirements of Section 17.

VI. If Section 17 of Chapter 3 is applicable, indicate the basis of determining groundwater will be protected. (Fill out only the applicable sections and indicate sections that are not applicable.)

A. Facility will not allow a discharge to groundwater. Briefly describe:

NA

B. Quality of wastewater is such that it will not cause a violation of groundwater standards. Briefly describe:

NA

C. Existing soils or geology will not allow a discharge to groundwater. Briefly describe:

NA

D. Basis of facility design is that it will be operated so as not to violate groundwater standards (example: maintenance of manure pack at animal waste treatment facility). Briefly describe:

NA

E. Discharge will result in groundwater concentrations in excess of standards but post discharge water quality can be returned to standards in accordance with Section 4 (d)(vi), Chapter VIII. Briefly describe:

NA

F. If water quality exceedances are allowed, briefly describe the parameter limits, property boundaries, places of withdrawal and any other information documenting that any users of affected aquifer will not be impacted.

NA

G. Briefly describe monitoring system (parameters, frequency, etc.). Clearly state the parameters to be utilized for determining compliance, what constitutes a violation and steps to be followed by the permittee in the event of a violation.

NA

VII. Documentation of Statement of Basis.

A. The archives file for this permit will include adequate documentation of all sections of this Statement of Basis.

#### CERTIFICATION

The issuance of this permit is based upon a review of the application package submitted in accordance with the requirements of Section 6, Chapter III, Wyoming Water Quality Rules and Regulations. This review was performed by Dennis Lamb, Northeast District Supervisor and completed on August 26, 2004. Permit issuance is recommended based upon statements, representations, and procedures presented in the permit application and supporting documents, permit conditions, and the items identified in this "Statement of Basis."

May 3, 2007

Mr. Marty Petrunyak  
Nelson Brothers Mining Services LLC  
PO Box 1478  
Gillette, WY 82717-1478

RE: Renewal Land Application Permit # 04-446/ Ref. Permit 02-272

Dear Mr. Petrunyak:

The Wyoming Department of Environmental Quality/Water Quality Division (WDEQ/WQD) has reviewed the Renewal of Land Application permit #04-446 received on April 5, 2007 for road application of plant washdown/boiler blow-down waste water. The soil samples from the roads that have received applications of the waste water indicate that nitrite, nitrate, and several metals including chromium, lead, arsenic, and barium are at elevated levels. The presence of these constituents in the waste water makes the continued application of this water to the roads unacceptable. WDEQ will not issue a renewal permit for continued application of the waste water.

If you have any questions please contact Dennis Lamb at 152 North Durbin, Casper, WY, 82601, (307) 473-3452. Thank you.

Sincerely,

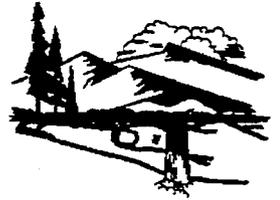

Dennis Lamb

RE: Lingle Rest Area Water and Sewer Line Extensions, Application No.04-447,Goshen County

Dear Mr. Bell:

The above application for coverage under General Permit to Construct, Install, Modify or Operate Extensions to or Modifications of Existing Public Water Supply Distribution Systems and of Existing Sewage Collection Systems described as 5062 ft 8" diameter water main and 2256 ft of 8" diameter sewer line, NE 1/4 Section 20 T25N R62W; Goshen County, in accordance with Chapter 3, Section 9 of the Wyoming Water Quality Rules and Regulations has been reviewed and is hereby approved. You are authorized to construct, install or modify the water distribution system in accordance with Chapter 12, Section 14 of the Water Quality Division Rules and Regulations, the sewage collection system in accordance with Chapter 12, Section 9 of the Water Quality Division Rules and Regulations, and both systems in accordance with the general permit and the materials submitted in your application package. All service connections will be protected by the appropriate backflow device as required by Chapter 12, Section 14(i) of the Water Quality Division Rules and Regulations. The vent line for the air/vacuum relief valve must be extended to discharge a minimum of 24" above the ground surface. A variance to the water line valve minimum spacing requirements is granted as there will be no service connections between the end of the Lingle system and the rest area. Sewer manhole spacing may be increased to one half of the length of the Town of Lingle rodding/jetting equipment reach. All construction, installation, or modification allowed by this notification of coverage shall be completed by May 10, 2007.

Your attention is directed to the mandatory reporting requirements outlined in Part V, Section O of the general permit. Please reference Application No. 04-447 in any future correspondence.

If you have any questions, please contact me at 307-777-7088.

Sincerely,

Louis B. Harmon PE-PG  
Southeast District Engineer  
Water Quality Division

WYOMING DEPARTMENT OF ENVIRONMENTAL QUALITY  
WATER QUALITY DIVISION  
PERMIT TO CONSTRUCT

PERMIT NO. 04-449

REFERENCE PERMIT NO. 04-061

Saratoga JPB WWTP Expansion Project

This permit hereby authorizes the applicant:

Town of Saratoga, Carbon County Impact JPB  
P.O. Box 486  
Saratoga, WY, 82331

to construct, install or modify a attached growth media aerobic treatment process for ammonia removal according to the procedures and conditions of the application number 04-449. The facility is located in SW 1/4 Section 1 T17N R84W in the county of Carbon, in the State of Wyoming. All construction, installation, or modification allowed by this permit shall be completed by September 15, 2006.

The issuance of this permit confirms that the Wyoming Department of Environmental Quality (DEQ) has evaluated the application submitted by the permittee and determined that it meets minimum applicable construction and design standards. The compliance with construction standards and the operation and maintenance of the facility to meet the engineer's design are the responsibility of the permittee, owner, and operator.

Granting this permit does not imply that DEQ guarantees or ensures that the permitted facility, when constructed, will meet applicable discharge permit conditions or other effluent or operational requirements. Compliance with discharge standards remains the responsibility of the permittee.

Nothing in this permit constitutes an endorsement by DEQ of the construction or the design of the facility described herein. This permit verifies only that the submitted application meets the design and construction standards imposed by Wyoming statutes, rules and regulations. The DEQ assumes no liability for, and does not in any way guarantee or warrant the performance or operation of the permitted facility. The permittee, owner and operator are solely responsible for any liability arising from the construction or operation of the permitted facility. By issuing this permit, the State of Wyoming does not waive its sovereign immunity.

The permittee shall allow authorized representatives from DEQ to enter and inspect any property, premise or place on or at which the facility is located or is being constructed or installed for the purpose of investigating actual or potential sources of water pollution, and for determining compliance or non-compliance with any rules, regulations, standards, permits or orders.

Nothing in this permit shall be construed to preclude the institution of any legal action or other proceeding to enforce any applicable provision of law or rules and regulations. It is the duty of the permittee, owner and operator to comply with all applicable federal, state and local laws or regulations in the exercise of its activities authorized by this permit.

The issuance of this permit does not convey any property rights in either real or personal property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.

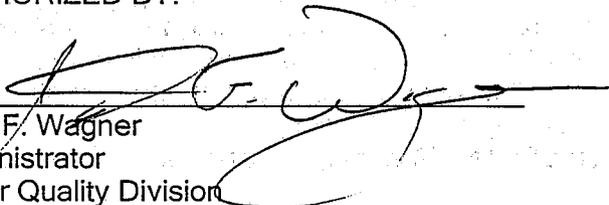

The permittee shall construct and operate the permitted facility in accordance with the statements, representations, procedures, terms and conditions of the permit application, supporting documents and

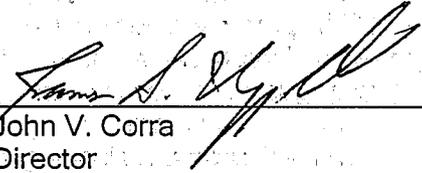

permit. This permit does not relieve the permittee from any duty to obtain any other permit or authorization that may be required by any provision of federal, state or local laws.

In carrying out its activities authorized by this permit, the permittee, owner and operator shall comply with all of the following permit conditions:

- 1 of 3 The applicant will provide immediate oral or written notice to the Southeast District, Water Quality Division, Herschler Building 4 West, Cheyenne, WY, 82002, Phone 307-777-7088, FAX 307-777-5973, in accordance with the provisions of Section 11, Chapter 3, Wyoming Water Quality Rules and Regulations of any changes or modifications which are not consistent with the terms and conditions of this permit.
  
- 2 of 3 Within sixty days of completion of construction of the authorized facility, the applicant will submit to the Southeast District, Water Quality Division, Herschler Building 4 West, Cheyenne, WY, 82002 a certification of completion signed by the Engineer of Record or the owner. A form titled "Certificate of Completion" has been provided.
  - a. Date that construction of the facility was completed; and
  - b. Date that the facility was placed in operation; and
  - c. Certification the facility was constructed in accordance with the terms and conditions of the permit; or
  - d. Certification the facility was completed with changes or modifications. Submittal of as-constructed plans and specifications for the system as it was constructed, certified by an engineer if appropriate is required. All modifications or deviations from the authorized plans must be highlighted.
  
- 3 of 3 The review and approval of this permit is based upon the items identified in the attached "Statement of Basis".

AUTHORIZED BY:

  
\_\_\_\_\_  
John F. Wagner  
Administrator  
Water Quality Division

  
\_\_\_\_\_

\_\_\_\_\_  
Date of Issuance

LBH/kg:04-0870

cc: Jim Keaton, Keaton Industries, P.O. Box 249, Wellington, CO 80549

## STATEMENT OF BASIS

1. Permit Number: 04-449
2. Application reviewed for compliance with the following applicable regulations :

Chapter(s) 3 and 11 of the Wyoming Water Quality Rules and Regulations

3. Does the permit comply with all applicable regulations identified above?

NO

The permit approval is based up on a deviation from applicable regulations in accordance with Section 5. of Chapter 3 and 11.

4. A 1/1000 scale pilot plant was operated during the spring of 2004. The pilot plant successfully demonstrated the effectiveness of the process at water temperatures of 0+ to 5°C. The pilot plant results and derivation of design parameters are included in the design report for this project.

No changes to the existing lagoon structure or linings will be made as part of this project, so there will be no changes on the impact of the Saratoga WWTP to groundwater.

5. A review to determine groundwater impacts in accordance with Section 17, Chapter 3 was not required.

6. Documentation of Statement of Basis: The archive file for this permit includes adequate documentation of all sections of this Statement of Basis.

## CERTIFICATION

The issuance of this permit is based upon a review of the application package submitted in accordance with the requirements of Chapter 3, Section 6, Wyoming Water Quality Rules and Regulations. This review was performed by Louis B. Harmon PE-PG, Southeast District Engineer, lharmo@state.wy.us, and completed on August 30, 2004. Permit issuance is recommended based upon statements, representations, and procedures presented in the permit application and supporting documents, permit conditions, and the items identified in this "Statement of Basis."

## NOTIFICATION OF COVERAGE

September 29, 2004

South Cheyenne Water and Sewer District  
Attn. Cliff Maloney, Operations Manager  
215 East Allison Drive  
Cheyenne, Wyoming 82007

RE: Day Break Valley Water & Sewer Extensions,

Application No. **04-450**

Dear Mr. Maloney:

The above application for coverage under General Permit to Construct, Install, Modify or Operate Extensions to or Modifications of Existing Public Water Supply Distribution Systems and Existing Sewage Collection Systems in accordance with Chapter 3, Section 9 of the Wyoming Water Quality Rules and Regulations has been reviewed and is hereby approved. You are authorized to construct, install or modify the water distribution system in accordance with Chapter 12, Section 14 of the Water Quality Division Rules and Regulations, the sewage collection system in accordance with Chapter 11, Section 9 of the Water Quality Division Rules and Regulations, and both systems in accordance with the general permits, and the materials submitted in your application package. All water service connections will be protected by the appropriate backflow device as required by Chapter 12, Section 14(i) of the Water Quality Division Rules and Regulations. Your attention is directed to the mandatory reporting requirements outlined in Part V, Section O of the general permits.

The approval granted under this Notification Of Coverage and the General Permit shall expire on September 29, 2006. Please reference Application Number 04-450 in any future correspondence.

If you have any questions, please contact me at (307) 777-6183.

Sincerely,

Ronald L. Ewald  
Environmental Senior Analyst
